Note: BSC-Basic Science Courses, PCC: Professional core. IPCC-Integrated Professional Core Courses, MCC- Mandatory Credit Course, AUD/AEC –Audit Course / Ability Enhancement Course(A pass in AUD/AEC is mandatory for the award of the degree), PCCL-Professional Core Course lab, L-Lecture, P-Practical, T/SDA-Tutorial / Skill Development Activities(Hours are for Interaction between faculty and students)

Integrated Professional Core Course (IPCC): Integrated Professional Core Course (IPCC): Refers to Professional Theory Core Course Integrated with practical of the same course. The theory part of the IPCC shall be evaluated both by CIE and SEE. The practical part shall be evaluated by only CIE (no SEE). However, questions from the practical part of IPCC shall be included in the SEE question paper.

Audit Courses /Ability Enhancement Courses Suggested by BOS (ONLINE courses): Audit Courses: These are prerequisite courses suggested by the concerned Board of Studies. Ability Enhancement Courses will be suggested by the BoS if prerequisite courses are not required for the programs. Ability Enhancement Courses:

- These courses are prescribed to help students to enhance their skills in fields connected to the field of specialisation as well allied fields that leads to employable skills. Involving in learning such courses are impetus to lifelong learning.
- The courses under this category are online courses published in advance and approved by the concerned Board of Studies.
- Registration to Audit /Ability Enhancement Course shall be done in consultation with the mentor and is compulsory during the concerned semester.
- In case a candidate fails to appear for the proctored examination or fails to pass the selected online course, he/she can register and appear for the same course if offered during the next session or register for a new course offered during that session, in consultation with the mentor.
- The Audit Ability Enhancement Course carries no credit and is not counted for vertical progression. However, a pass in such a course is mandatory for the award of the degree.

Skill development activities: Under Skill development activities in a concerning course, the students should

- 1. Interact with industry (small, medium, and large).
- 2. Involve in research/testing/projects to understand their problems and help creative and innovative methods to solve the problem.
- 3. Involve in case studies and field visits/ fieldwork.
- 4. Accustom to the use of standards/codes etc., to narrow the gap between academia and industry.
- 5. Handle advanced instruments to enhance technical talent.
- 6. Gain confidence in modelling of systems and algorithms for transient and steady-state operations, thermal study, etc.

7. Work on different software/s (tools) to simulate, analyze and authenticate the output to interpret and conclude.

All activities should enhance student's abilities to employment and/or self-employment opportunities, management skills, Statistical analysis, fiscal expertise, etc.

Students and the course instructor/s to involve either individually or in groups to interact together to enhance the learning and application skills of the study they have undertaken. The students with the help of the course teacher can take up relevant technical –activities which will enhance their skill. The prepared report shall be evaluated for CIE marks.

Note:

1 Mini Project with Seminar: This may be hands-on practice, survey report, data collection and analysis, coding, mobile app development, field visit and report preparation, modelling of system, simulation, analysing and authenticating, case studies, etc.

CIE marks shall be awarded by a committee comprising of HoD as Chairman, Guide/co-guide, if any, and a senior faculty of the department. Students can present the seminar based on the completed mini-project. Participation in the seminar by all postgraduate students of the program shall be mandatory.

The CIE marks awarded for Mini-Project work and Seminar shall be based on the evaluation of Mini Project work and Report, Presentation skill and performance in Question and Answer session in the ratio 50:25:25. Mini-Project with Seminar shall be considered as a head of passing and shall be considered for vertical progression as well as for the award of degree. Those, who do not take-up/complete the Mini Project and Seminar shall be declared as fail in that course and have to complete the same during the subsequent semester. There is no SEE for this course.

2. Internship: All the students shall have to undergo a mandatory internship of 06 weeks during the vacation of II and III semesters. A University examination shall be conducted during III semester and the prescribed internship credit shall be counted in the same semester. The internship shall be considered as a head of passing and shall be considered for vertical progression as well as for the award of degree. Those, who do not take-up/complete the internship shall be declared as fail in the internship course and have to complete the same during the subsequent University examination after satisfying the internship requirements.

Note:

1. Project Work Phase-1: The project work shall be carried out individually. However, in case a disciplinary or interdisciplinary project requires more participants, then a group consisting of not more than three shall be permitted.

Students in consultation with the guide/co-guide (if any) in disciplinary project or guides/co-guides (if any) of all departments in case of multidisciplinary projects, shall pursue a literature survey and complete the preliminary requirements of the selected Project work. Each student shall prepare a relevant introductory project document, and present a seminar.

CIE marks shall be awarded by a committee comprising of HoD as Chairman, all Guide/s and co-guide/s (if any) and a senior faculty of the concerned departments. The CIE marks awarded for project work phase -1, shall be based on the evaluation of Project Report, Project Presentation skill, and performance in the Question and Answer session in the ratio of 50:25:25.

2. Societal Project: Students in consultation with the internal guide as well as with external guide (much preferable) shall involve in applying technology to work out/proposing viable solutions for societal problems.

CIE marks shall be awarded by a committee comprising of HoD as Chairman, Guide/co-guide if any, and a senior faculty of the department. The CIE marks awarded shall be based on the evaluation of Project Report, Project Presentation skill, and performance in the Question and Answer session in the ratio of 50:25:25.

Those, who have not pursued /completed the Societal Project, shall be declared as fail in the course and have to complete the same during subsequent semester/s after satisfying the Societal Project requirements. There is no SEE (University examination) for this course.

3. Internship: Those, who have not pursued /completed the internship, shall be declared as fail in the internship course and have to complete the same during subsequent University examinations after satisfying the internship requirements. Internship SEE (University examination) shall be as per the University norms.

CIE marks shall be awarded by a committee comprising of HoD as Chairman, Guide/co-guide if any, and a senior faculty of the department. The CIE marks awarded for project work phase -1, shall be based on the evaluation of Project Report, Project

Presentation skill, and performance in the Question and Answer session in the ratio of 50:25:25.

Note:

1. Project Work Phase-2:

Students in consultation with the guide/co-guide (if any) in disciplinary project or guides/co-guides (if any) of all departments in case of multidisciplinary projects, shall continue to work of Project Work phase -1to complete the Project work. Each student / batch of students shall prepare project document, and present a seminar.

CIE marks shall be awarded by a committee comprising of HoD as Chairman, all Guide/s and co-guide/s (if any) and a senior faculty of the concerned departments. The CIE marks awarded for project work phase -2, shall be based on the evaluation of Project Report, Project Presentation skill, and performance in the Question and Answer session in the ratio of 50:25:25.

SEE shall be at the end of IV semester. Project work evaluation and Viva-Voce examination (SEE), after satisfying the plagiarism check, shall be as per the University norms.

I SEMESTER

Semester- I										
Applied Mathematics										
Course Code	22MPT11	CIE Marks	50							
Teaching Hours/Week (L:P:SDA)	3:0:0	SEE Marks	50							
Total Hours of Pedagogy	40 Hrs	Total Marks	100							
Credits	03	Exam Hours	03							

Course Learning objectives:

- To have an insight into solving Linear Algebraic Equations.
- Learn to use the roots of equations.
- To develop proficiency in solving ordinary and partial differential equations arising in engineering applications, using numerical methods.
- To enable learning concepts of Sampling theory, RBD and their implication in Mechanical Engineering.
- To understand the techniques of Simple mathematical models in estimating high accuracy and their applications.

Module-1

Approximations and round off errors: Significant figures, accuracy and precision, error definitions, round off errors, inherent error and truncation errors, problems. Mathematical modeling and Engineering problem solving: A Simple mathematical models, conservation laws of Engineering. **8Hrs**

Teaching-Learning Process

Chalk and Talk / White board, Power Point Presentation.

Module-2

System of Linear Algebraic Equations and Eigen Value Problems: Guass-Jordan method, Cholesky Method, Partition method, Bounds on Eigen, values, Jacobi Method, Given Method for symmetric matrices, Householder's method for symmetric matrices.

-	
Teaching-Learning Process	Chalk and Talk / White board, Power Point Presentation

Module-3

Roots of Equations by numerical methods: Introduction, Secant method, Newton-Raphson method, Horner's method.Numerical solutions of ordinary differential equations: Introduction, Picard's method of successive opproximation,
solution of ODE by simultaneous& higher order equations (Picard's & RungeKutta methods)8Hrs

Teaching-Learning Process

Chalk and Talk / White board, Power Point Presentation

Module-4

Nur equa	nerical solution of one dimensiona ation(Gauss-Seidel process) by finite di	l wave equation, Heat equation,(Schmidt`s explicit formula)& Laplace fferential schemes. Illustrative examples on each method. 8Hrs						
Теа	ching-Learning Process	Chalk and Talk / White board, Power Point Presentation						
Module-5								
San clas	ppling theory: Testing of hypothesis: sification, Design of experiments, RBD	Chi square test & F- test. Analysis of variation (ANOVA): One way 8Hrs						
Теа	ching-Learning Process	Chalk and Talk / White board, Power Point Presentation						
Ass	essment Details (both CIE and SE	E)						
The weightage of Continuous Internal Evaluation (CIE) is 50% and for Semester End Exam (SEE) is 50%. The minimum passing mark for the CIE is 50% of the maximum marks. Minimum passing marks in SEE is 40% of the maximum marks of SEE. A student shall be deemed to have satisfied the academic requirements and earned the credits allotted to each subject/ course if the student secures not less than 50% (50 marks out of 100) in the sum total of the CIE (Continuous Internal Evaluation) and SEE (Semester End Examination) taken together.								
Cor	itinuous Internal Evaluation:							
 Three Unit Tests each of 20 Marks Two assignments each of 20 Marks or oneSkill Development Activity of 40 marks to attain the COs and POs 								
The	sum of three tests, two assignments/	skill Development Activities, will be scaled down to 50 marks						
CIE out	methods /question paper is designment of the course.	gned to attain the different levels of Bloom's taxonomy as per the						
Sen	nester End Examination:							
1. 2. 3.	The SEE question paper will be set for The question paper will have ten full q Each full question is for 20 marks. The	100 marks and the marks scored will be proportionately reduced to 50. uestions carrying equal marks. re will be two full questions (with a maximum of four sub-questions) from each

Course outcome

At the end of the course the student will be able to :

Sl. No.	Description	Blooms Level					
CO1	Acquire the idea of significant figures, types of errors during numerical computation.	L1, L2, L3, L4					
CO2	Learn various numerical methods to solve system of linear equations	L1, L2, L3, L4,L5					
CO3	Analyze and solve PDE"s related to wave equation arising in vibration analysis.	L1, L2, L3, L4,L5					
Program Outcome of this course							

Sl. No.	Description	POs
1	An ability to independently carry out research /investigation and development work to solve practical problems.	P01
2	An ability to write and present a substantial technical report/document.	P02
3	Students should be able to demonstrate a degree of mastery over the area as per the specialization of the program. The mastery should be at a level higher than the requirements in the appropriate bachelor program	PO3
4	Understand contemporary issues in manufacturing engineering and develop relationship between product design and manufacturability to create safe, reliable, and cost-effective products.	PO4
5	Understand the process of converting customer needs into engineering specifications to create product designs that are sensitive to user needs and robust against unanticipated uses and misuse	PO5
6	Employ advanced prototyping methods to shorten design cycles and narrow alternatives without restricting innovation.	P06
7	Understand and debate the roles and responsibilities of a product designer/manufacturer on society.	P07

Mapping of COS and POs (Indicative only)

Total Hours of F	Pedagogy	40 hours Theory + 10-12 Lab slots	Total Marks	100						
Credits 04 Exam Hours 03										
 Course objectives: To learn the basic concepts of Computer Aided Engineering and different discretization methods. To learn the different meshing techniques. To imbibe the basic knowledge of CAD, CAE and CIM To develop the fundamental skill sets in CNC Programming To inculcate the fundamental knowledge in automated material handling and storage system. 										
Elemental Properties: Introduction to Computer Aided Engineering, CAE in product development discretization methods- Finite Element Method (FEM), Finite Difference Method (FDM) and Finite Volume Method (FVM), CAE tools Pre processor, Solver, Post processor.Element Shapes: 1D, 2D and 3D elements, Nodal unknowns and Field variables.8Hrs										
Teaching- Learning Chalk and Talk, Power point presentation, Animations Process										
		MODULE-2								
Meshing Techi mesh, Effect o	niques: Discretization of a st f mesh density in critical reg	ructure, 1D, 2D and 3D element meshir gion, use of symmetry.	ng, Elements selectior	criteria, Refining						
Teaching- Learning Proces	SS Chalk and Talk, Power	point presentation, Animations								
		MODULE-3								
Production dev cycle, Introduct	elopment through CIM: Co ion of CAD/CAM & CIM, sec	mputers in Industrial manufacturing, P juential and concurrent engineering, so	roduct cycle & Produ ft and hard prototypir	ction development ng.						
Computer Proc optimal control	ess Monitoring: Process cor , on line search strategies, a	ntrol methods, direct digital control, sup daptive control.	pervisory computer co 8H	ontrol, steady state I rs						
Teaching- Learning Process	Chalk and Talk, Power poi	nt presentation, Animations								
		MODULE-4								
Computer Integrated Manufacturing: Fundamentals of CAD/CAM, Computerized Manufacturing planning systems, shop floor control & automatic identification techniques. Computer Network for manufacturing, and the future automated factor.										
Teaching- Learning Process	Chalk and Talk, Power poi	nt presentation, Animations								
MODULE 5										

Automated material Handling Storage: Material functions, types of material handling equipment, analysis of material handling systems, design of system, conveyor system, automated guided vehicle systems, automated storage/retrieval systems, caroused storage systems work in process storage, interfacing handling & storage with manufacturing. 8Hrs

Teaching-	
Learning	Chalk and Talk, Power point presentation, Animations
Process	

PRACTICAL COMPONENT OF IPCC

Sl. No	Experiments
1	Study of Finite Element Analysis Package - 1D, 2D, Structural problems
2	Evaluation of displacement (Strain) and Stress.
3	Problems involving on Beams and Trusses
4	Problems involving Trusses
5	Study of functions assigned to Alphabets and Symbols. G and M codes, grouping of codes, Assigned and Unassigned, Model and Non Model codes.
6	Writing the program for Step Turning
7	Writing the program for Taper Turning
8	Writing the program for Threading
9	Writing the program for Milling
10	Writing the program for Drilling
	Experiments/ Activities/Demonstrations/Visits/Analytics etc., that enhances the skill of the learners
	(Activities are only for CIE)
1	Exercises on Robots
2	General Configuration of
3	a. Robot, b. Different Programming methods
4	Overview of Robot languages.
Assess	ment Details (both CIE and SEE)
The wei	ghtage of Continuous Internal Evaluation (CIE) is 50% and for Semester End Exam (SEE) is 50%. The minimum
passing	mark for the CIE is 50% of the maximum marks. Minimum passing marks in SEE is 40% of the maximum marks of
SEE. As	student shall be deemed to have satisfied the academic requirements and earned the credits allotted to each

subject/ course if the student secures not less than 50% (50 marks out of 100) in the sum total of the CIE

(Continuous Internal Evaluation) and SEE (Semester End Examination) taken together

CIE for the theory component of IPCC

- 1. Two Tests each of 20 Marks
- 2. Two assignments each of **10 Marks/One Skill Development Activity of 20 marks**
- 3. Total Marks of two tests and two assignments/one Skill Development Activity added will be CIE for 60 marks, marks scored will be proportionally scaled down to **30 marks**.

CIE for the practical component of IPCC

- On completion of every experiment/program in the laboratory, the students shall be evaluated and marks shall be awarded on the same day. The**15 marks** are for conducting the experiment and preparation of the laboratory record, the other **05 marks shall be for the test** conducted at the end of the semester.
- The CIE marks awarded in the case of the Practical component shall be based on the continuous evaluation of the laboratory report. Each experiment report can be evaluated for 10 marks. Marks of all experiments' write-ups are added and scaled down to 15 marks.
- The laboratory test at the end /after completion of all the experiments shall be conducted for 50 marks and scaled down to 05 marks.

Scaled-down marks of write-up evaluations and tests added will be CIE marks for the laboratory component of IPCC for **20 marks**.

SEE for IPCC

Theory SEE will be conducted by University as per the scheduled timetable, with common question papers for the course (duration 03 hours)

- 1. The question paper will be set for 100 marks and marks scored will be scaled down proportionately to 50 marks.
- 2. The question paper will have ten questions. Each question is set for 20 marks.
- **3.** There will be 2 questions from each module. Each of the two questions under a module (with a maximum of 3 sub-questions), **should have a mix of topics** under that module.
- 4. The students have to answer 5 full questions, selecting one full question from each module.

The theory portion of the IPCC shall be for both CIE and SEE, whereas the practical portion will have a CIE component only. Questions mentioned in the SEE paper shall include questions from the practical component).

- The minimum marks to be secured in CIE to appear for SEE shall be the 15 (50% of maximum marks-30) in the theory component and 10 (50% of maximum marks -20) in the practical component. The laboratory component of the IPCC shall be for CIE only. However, in SEE, the questions from the laboratory component shall be included. The maximum of 04/05 questions to be set from the practical component of IPCC, the total marks of all questions should not be more than the 20 marks.
- SEE will be conducted for 100 marks and students shall secure 40% of the maximum marks to qualify in the SEE. Marks secured will be scaled down to 50. (Student has to secure an aggregate of 50% of maximum marks of the course(CIE+SEE)

Decision- Making Techniques

Course Code	22MPT13	CIE Marks	50
Teaching Hours/Week (L:P:SDA)	3:0:2	SEE Marks	50
Total Hours of Pedagogy	40 Hrs theory +10-12 activities	Total Marks	100
Credits	04	Exam Hours	03

Course Learning objectives:

- To provide greater insight into decision-making processes with strong fundamentals.
- To understand how people perceive and decide about risk and transform domain situation to LPP and solve it.
- To formulate domain situations into Transportation, Assignment, and Travelling salesman problems and derive Optimum solutions.
- To formulate game theory problems and obtain solutions using different methods and to understand the fundamentals of Queues.
- To develop an appropriate network diagram for the given problem and analyse the project using CPM/PERT, Crash the project and obtained minimum cost/time schedule.

Module-1

Introduction: Statistics and managerial decisions, statistical data and Operations Research techniques.

Fundamentals of Statistics and Probability: Presentation and Analysis of Statistical Data, Measures of Central tendency and Location, Measure of Dispersion, Skewness and Kurtosis: Numerical Problems, Introduction to Probability and basic rules of probability.
 8Hrs

Teaching-
LearningChalk and talk, Videos, PowerPoint Presentation, Animations, Analytical methods, Problem solving,
Numerical exercises, Creating conducive environment in classroom for discussions and understanding
through peer learning, promoting self learning activities and Giving assignments.

Module-2

Decision Making under Uncertainty: Alternative criteria for decision under uncertainty. Numerical Examples.

Linear Programming Problem: Formulation of LPPs, Solution of LPPs by graphical method.

Solution of LPP by simplex method: Concept of duality and solution of dual problems, Solution of LPP by dual simplexTeaching-
Learning ProcessChalk and talk, Videos, PowerPoint Presentation, Animations, Analytical methods, Problem solving,
Numerical exercises, Creating conducive environment in classroom for discussions and understanding
through peer learning, promoting self learning activities and Giving assignments

Module-3

Transportation and Assignment Problems: Structure of transportation problem and various methods to find IBFS, Optimality test of transportation problems by MODI method, Solution of degeneracy and unbalanced transportation problems, Time minimisation problems, Assignment problems and solution by Hungarian method, Flight scheduling problems, and Travelling Salesman-problem (TSP). **8Hrs**

Teaching-	Chalk and talk, Videos, PowerPoint Presentation, Animations, Analytical methods, Problem solving,
Learning	Numerical exercises, Creating conducive environment in classroom for discussions and understanding
Process	through peer learning, promoting self learning activities and Giving assignments

Module-4

Theory of Games: Two person zero sum game, Mini-max & Maxi-min strategies, Solution of game by dominance rules, arithmetic and algebraic methods, $m \times 2$ and $2 \times n$ games: Solution by method of sub games and graphical method. 3×3 games: Solution by method of matrices, approximate method using iterative procedure.

Waiting Line: Basic structure of queuing systems and characteristics, Expressions for $[(M/M/l):(FCFS/\infty/\infty)]$ queuing
model. Simple Problems.8Hrs

Teaching-	Chalk and talk, Videos, PowerPoint Presentation, Animations, Analytical methods, Problem solving,
Learning	Numerical exercises, Creating conducive environment in classroom for discussions and understanding

Process through peer learning, promoting self learning activities and Giving assignments

Module-5

Network Analysis: PERT and CPM, Network construction and determination of critical path, Calculation of ES, EF, LS, LF, TF, FF and IF, Crashing of projects to obtain minimum cost/minimum time schedule.

Simulation of Management Systems: Simulation and Monte Carlo method, Waiting line and inventory simulation models. 8Hrs

Teaching-	Chalk and talk, Videos, PowerPoint Presentation, Animations, Analytical methods, Problem solving,
Learning	Numerical exercises, Creating conducive environment in classroom for discussions and understanding
Process	through peer learning, promoting self learning activities and Giving assignments

Assessment Details (both CIE and SEE)

The weightage of Continuous Internal Evaluation (CIE) is 50% and for Semester End Exam (SEE) is 50%. The minimum passing mark for the CIE is 50% of the maximum marks. Minimum passing marks in SEE is 40% of the maximum marks of SEE. A student shall be deemed to have satisfied the academic requirements and earned the credits allotted to each subject/ course if the student secures not less than 50% (50 marks out of 100) in the sum total of the CIE (Continuous Internal Evaluation) and SEE (Semester End Examination) taken together.

Continuous Internal Evaluation:

- 1. Three Unit Tests each of **20 Marks**
- 2. Two assignments each of **20 Marks** or **one Skill Development Activity of 40 marks** to attain the COs and POs

The sum of three tests, two assignments/skill Development Activities, will be scaled down to 50 marks

CIE methods /question paper is designed to attain the different levels of Bloom's taxonomy as per the outcome defined for the course.

Semester End Examination:

- 1. The SEE question paper will be set for 100 marks and the marks scored will be proportionately reduced to 50.
- 2. The question paper will have ten full questions carrying equal marks.
- 3. Each full question is for 20 marks. There will be two full questions (with a maximum of four sub-questions) from each module.
- 4. Each full question will have a sub-question covering all the topics under a module.
- 5. The students will have to answer five full questions, selecting one full question from each module

Suggested Learning Resources:

Text Books:

- 1. Quantitative Techniques for Managerial Decisions U K Srivastava, G V Shenoy, and S C Sharma, New Age International (P) Ltd., Publishers
- 2. Operations Research: P K Gupta and D S Heera S Chand & Company Ltd.

Reference Books

- 1. Operations Research H. A. Taha- Prentice Hall of India
- 2. Introduction to Operations Research Hillier and Liberman- McGraw Hill International
- 3. Operations Research S. D Sharma, Kedar Nath Ram Nath & Company Ltd.

- <u>https://www.youtube.com/watch?v=4OdutS9mSZA</u>
- <u>https://www.youtube.com/watch?v=j8CbEoF9c6Y</u>

Skill Development Activities Suggested

- At the end of the lecture/presentation, numerical exercises are to be taken up to solve problems related to the topics covered. Additional problems are to be given for practice and also as assignments under each of the topics covered.
- Field visits are to be made to collect empirical data pertaining to various decision-making models and subsequently the appropriate model is to be applied to solve the problems.

Course outcome

At the end of the course the student will be able to :

SI. No.	Description	Blooms Level	
CO1	To explain the need for Statistics in managerial decision making and compute the various measures of central tendency, dispersion, skewness and kurtosis for the collected statistical data	L1, L2, L3, L4	
CO2	Identify situations of DMUR and solve it. Formulate LPP and derive optimal solutions using graphical method or Simplex method of different varieties	L1, L2, L3, L4	
CO3	Identify the situations appropriate for the application of Transportation, Assignment, and Travelling salesman problems and derive optimum solution.	L1, L2, L3, L4	
CO4	Identify the areas of application of Game theory and formulate mathematical problems with competitive situations and derive solutions. Explain waiting line problems and derive solution for $[(M/M/l):(FCFS/\infty/\infty)]$ queuing model.	L1, L2, L3, L4, L5	
CO5	Apply the appropriate network techniques (PERT/CPM) to projects and Obtain optimum time/cost Networks through crashing. Apply Monte-Carlo simulation for waiting line and inventory situations.	L1, L2, L3, L4, L5	

Program Outcome of this course

Sl. No.	Description	POs
1	An ability to independently carry out research/investigation and development work to solve practical problems	PO1
2	An ability to write and present a substantial technical report/document.	PO2
3	To be able to demonstrate a degree of mastery over the area as per the specialization of the program.	PO3
4	Understand contemporary issues in manufacturing engineering and develop relationship between product design and manufacturability to create safe, reliable, and cost-effective products.	PO4
5	Understand the process of converting customer needs into engineering specifications to create product designs that are sensitive to user needs and robust against unanticipated use and misuse	PO5
6	Employ advanced prototyping methods to shorten design cycles and narrow alternatives without restricting innovation.	PO6
7	Understand and debate the roles and responsibilities of a product designer/manufacturer on society.	PO7

Theory of Metal Cutting

Course Code	22MPT14	CIE Marks	50
Teaching Hours/Week (L:P:SDA)	2:0:2	SEE Marks	50
Total Hours of Pedagogy	25 Hrs Theory +10-12 activities	Total Marks	100
Credits	03	Exam Hours	03

Course Learning objectives:

- Understand and analyze the fundamentals of different cutting too land materials.
- Understand and analyze Mechanics of metal cutting.
- Understandandanalyzecuttingforceanditsmeasurementsusingdynamometers and temperature distribution during metal cutting.
- Understand and analyze tool wear and tool life-mechanisms and effects.
- Understand and analyze the Thermal Aspects and selection of cutting fluids and Optimum cutting speed and cost techniques.

Module-1

Mechanics of Metal Cutting: Mechanism of chip formation, Orthogonal & Oblique cutting, types of chips, built-up edge, Determination of shear plane angle, forces on the chips, forces in orthogonal cutting, Merchant circle diagram and analysis, Theory of Lee & Shaffer, coefficient of friction, power & energy relationship, velocity relationship, shear-strain, factors affecting forces and power, problems Geometry Of Cutting Tools: Single point and multi point cutting tools, tools nomenclature, tool point reference systems, tool signature, Recommended tool angles, Effect of cutting parameters on tool geometry.

Teaching-Learning Process

g- Chalk and talk, Videos, PowerPoint Presentation, Animations, Analytical methods, Problem solving,
 g Numerical exercises, Creating conducive environment in classroom for discussions and understanding through peer learning, promoting self learning activities and Giving assignments

Module-2

Tool Materials And Their Properties: Characteristics of tool materials, types of tool materials – carbon tool steels, high speed steels, cast alloys, cemented carbides, ceramics, diamonds, SIALON, CBN, UCON, recommended cutting speeds for the above tools, discussion on die steels, air, water, oil hardening of tools and their applications.

Tool Wear, Tool Life: Mechanisms of tool wear, Sudden & gradual wear, crater wear, flank wear, tool failure criteria, tool life equations, effect of process parameters on tool life, tool life tests, conventional & accelerated tool wear measurement, machinability index. **5Hrs**

Teaching-	Chalk and talk, Videos, PowerPoint Presentation, Animations, Analytical methods, Problem solving,
Learning	Numerical exercises, Creating conducive environment in classroom for discussions and understanding
Process	through peer learning, promoting self learning activities and Giving assignments.

Module-3

Measurement Of Cutting Forces: Reasons for measuring cutting forces, Classification of cutting force dynamometers – mechanical, hydraulic, pneumatic, optical, inductance, piezoelectric, and strain gage

type dynamometers. **Dynamometers For Machine Tools:** Dynamometers for lathe, drilling, grinding and milling, Calibration of dynamometers. **5Hrs**

Teaching-
Learning
ProcessChalk and talk, Videos, PowerPoint Presentation, Animations, Creating conducive environment in
classroom for discussions and understanding through peer learning, promoting self learning activities
and Giving assignments

Module-4

Thermal Aspects In Metal Cutting: Heat sources in metal cutting, temperature in chip formation, temperature distribution, and experimental determination of tool temperatures. Cutting Fluids: Basic actions of cutting fluids, properties of cutting fluids, selection of cutting fluids, application of cutting fluids, filtration of fluids, recommended cutting fluids. SHrs

Teaching-	Chalk and talk, Videos, PowerPoint Presentation, Animations, Creating conducive environment in
Learning	classroom for discussions and understanding through peer learning, promoting self learning activities
Process	and Giving assignments
	Module-5
Economics Of	Machining: Introduction, elements of total production cost, optimum cutting speed and tool life for

minimum cost, optimum cutting speed and tool life for maximum production, problems.

Advanced Machining Techniques: Cryo machining & high speed machining. Causes of vibration and chatter in machining, and their remedy. 5Hrs

Teaching-	Chalk and talk, Videos, PowerPoint Presentation, Animations, Creating conducive environment in
Learning	classroom for discussions and understanding through peer learning, promoting self learning activities and
Process	Giving assignments

Assessment Details (both CIE and SEE)

The weightage of Continuous Internal Evaluation (CIE) is 50% and for Semester End Exam (SEE) is 50%. The minimum passing mark for the CIE is 50% of the maximum marks. Minimum passing marks in SEE is 40% of the maximum marks of SEE. A student shall be deemed to have satisfied the academic requirements and earned the credits allotted to each subject/ course if the student secures not less than 50% (50 marks out of 100) in the sum total of the CIE (Continuous Internal Evaluation) and SEE (Semester End Examination) taken together.

Continuous Internal Evaluation:

- 1. Three Unit Tests each of 20 Marks
- 2. Two assignments each of **20 Marks** or **oneSkill Development Activity of 40 marks** to attain the COs and POs

The sum of three tests, two assignments/skill Development Activities, will be scaled down to 50 marks

CIE methods /question paper is designed to attain the different levels of Bloom's taxonomy as per the outcome defined for the course.

Semester End Examination:

1. The SEE question paper will be set for 100 marks and the marks scored will be proportionately reduced to 50. **Suggested Learning Resources:**

Books

- 1. Metal Cutting Principles M.C. Shaw Oxford Publication 1985.
- 2. Fundamentals of metal cutting & Machine Tools-by B.L.Juneja& G.S-Sekhar -Wiley Eastern.

RESEARCH METHODOLOGY AND IPR					
Course Code	22RMI16	CIE Marks	50		
Teaching Hours/Week (L:P:SDA)	3:0:0	SEE Marks	50		
Total Hours of Pedagogy	40	Total Marks	100		
Credits	03	Exam Hours	03		

Course Learning objectives:

- To give an overview of the research methodology and explain the technique of defining a research problem
- To explain the functions of the literature review in research.
- To explain carrying out a literature search, its review, developing theoretical and conceptual frameworks and writing a review.
- To explain various research designs and their characteristics.
- To explain the details of sampling designs, and also different methods of data collections.
- To explain the art of interpretation and the art of writing research reports.
- To explain various forms of the intellectual property, its relevance and business impact in the changing global business environment.
- To discuss leading International Instruments concerning Intellectual Property Rights

MODULE-1

Research Methodology: Introduction, Meaning of Research, Objectives of Research, Motivation in Research, Types of Research, Research Approaches, Significance of Research, Research Methods versus Methodology, Research and Scientific Method, Importance of Knowing How Research is Done, Research Process, Criteria of Good Research, and Problems Encountered by Researchers in India.

Defining the Research Problem: Research Problem, Selecting the Problem, Necessity of Defining the Problem, Technique Involved in Defining a Problem, An Illustration. **8Hrs**

Teaching-Learning Process Power-point Presentation, Chalk and Talk are used for Problem Solving,

MODULE-2

Reviewing the literature: Place of the literature review in research, Bringing clarity and focus to your research problem, Improving research methodology, Broadening knowledge base in research area, Enabling contextual findings, How to review the literature, searching the existing literature, reviewing the selected literature, Developing a theoretical framework, Developing a conceptual framework, Writing about the literature reviewed.

Research Design: Meaning of Research Design, Need for Research Design, Features of a Good Design, Important Concepts Relating to Research Design, Different Research Designs, Basic Principles of Experimental Designs, Important Experimental Designs. **8Hrs**

Teaching-Learning Process Power-point Presentation, Chalk and Talk are used for Problem Solving,				
MODULE-3				
Design of Sampling: Introduction, Sample Design, Sampling and Non-sampling Errors, Sample Survey versus Census Survey, Types of Sampling Designs.				
Measurement and Scaling: Qualitative and Quantitative Data, Classifications of Measurement				

Scales, Goodness of Measurement Scales, Sources of Error in Measurement Tools, Scaling, Scale Classification Bases, Scaling Techniques, Multidimensional Scaling, Deciding the Scale.

Data Collection: Experimental and Surveys, Collection of Primary Data, Collection of Secondary Data, Selection of Appropriate Method for Data Collection, Case Study Method.8Hrs

Teaching-Learning Process	Power-point Presentation, Chalk and Talk are used for Problem Solving,

MODULE-4

Testing of Hypotheses: Hypothesis, Basic Concepts Concerning Testing of Hypotheses, Testing of Hypothesis, Test Statistics and Critical Region, Critical Value and Decision Rule, Procedure for Hypothesis Testing, Hypothesis Testing for Mean, Proportion, Variance, for Difference of Two Mean, for Difference of Two Proportions, for Difference of Two Variances, P-Value approach, Power of Test, Limitations of the Tests of Hypothesis.

Chi-square Test: Test of Difference of more than Two Proportions, Test of Independence of Attributes, Test of Goodness of Fit, Cautions in Using Chi Square Tests. **8Hrs**

Teaching-Learning Process Power-point Presentation, Chalk and Talk are used for Problem Solving,

MODULE-5

Interpretation and Report Writing: Meaning of Interpretation, Technique of Interpretation, Precaution in Interpretation, Significance of Report Writing, Different Steps in Writing Report, Layout of the Research Report, Types of Reports, Oral Presentation, Mechanics of Writing a Research Report, Precautions for Writing Research Reports.

Intellectual Property: The Concept, Intellectual Property System in India, Development of TRIPS Complied Regime in India, Patents Act, 1970, Trade Mark Act, 1999, The Designs Act, 2000, The Geographical Indications of Goods (Registration and Protection) Act1999, Copyright Act,1957,The Protection of Plant Varieties and Farmers" Rights Act, 2001, The Semi-Conductor Integrated Circuits Layout Design Act, 2000, Trade Secrets, Utility Models, IPR and Biodiversity, The Convention on Biological Diversity (CBD) 1992, Competing Rationales for Protection of IPRs, Leading International Instruments Concerning IPR, World Intellectual Property Organisation(WIPO), WIPO and WTO, Paris Convention for the Protection of Industrial Property, National Treatment, Right of Priority, Common Rules, Patents, Marks, Industrial Designs, Trade Names, Indications of Source, Unfair Competition, Patent Cooperation Treaty (PCT), Advantages of PCT Filing, Berne Convention for the Protection of Literary and Artistic Works, Basic Principles, Duration of Protection, Trade Related Aspects of Intellectual Property Rights(TRIPS) Agreement, Covered under TRIPS Agreement, Features of the Agreement, Protection of Intellectual Property under TRIPS, Copyright and Related Rights, Trademarks, Geographical indications, Industrial Designs, Patents, Patentable Subject Matter, Rights Conferred, Exceptions, Term of protection, Conditions on Patent Applicants, Process Patents, Other Use without Authorization of the RightHolder, Layout-Designs of Integrated Circuits, Protection of Undisclosed Information, Enforcement of Intellectual Property Rights, UNSECO. 8Hrs

Teaching-Learning Process	Power-point Presentation, Chalk and Talk are used for Problem Solving,

Assessment Details (both CIE and SEE)

The weightage of Continuous Internal Evaluation (CIE) is 50% and for Semester End Exam (SEE) is 50%. The minimum passing mark for the CIE is 50% of the maximum marks. Minimum passing marks in SEE is 40% of the maximum marks of SEE. A student shall be deemed to have satisfied the academic requirements and earned the credits allotted to each subject/ course if the student secures not less than 50% (50 marks out of 100) in the sum total of the CIE (Continuous Internal Evaluation) and SEE (Semester End Examination) taken together.

Continuous Internal Evaluation:

- 1. Three Unit Tests each of 20 Marks
- 2. Two assignments each of **20 Marks** or **one Skill Development Activity of 40 marks** to attain the COs and POs

The sum of three tests, two assignments/skill Development Activities, will be scaled down to 50 marks

CIE methods /question paper is designed to attain the different levels of Bloom's taxonomy as per the outcome defined for the course.

Semester End Examination:

- 1. The SEE question paper will be set for 100 marks and the marks scored will be proportionately reduced to 50.
- 2. The question paper will have ten full questions carrying equal marks.
- 3. Each full question is for 20 marks. There will be two full questions (with a maximum of four sub-questions) from each module.
- 4. Each full question will have a sub-question covering all the topics under a module.
- 5. The students will have to answer five full questions, selecting one full question from each module

Suggested Learning Resources:

Books

- 1. C.R. Kothari, Gaurav Garg, "Research Methodology: Methods and Techniques", New Age International, 4th Edition, 2018.
- Ranjit Kumar, "Research Methodology a step-by-step guide for beginners", SAGE Publications, 3rd Edition, 2011 (For the topicReviewing the literature under module 2)
- Study Material Professional Programme Intellectual Property Rights, Law and Practice, The Institute of Company Secretaries ofIndia, Statutory Body Under an Act of Parliament, September 2013. (For the topic Intellectual Property under module 5)
- 4. William M. K. Trochim ; 1stEdition, illustrated ; Publisher, Atomic Dog Pub., 2005
- 5. Fink A, "Conducting Research Literature Reviews: From the Internet to Paper", Sage Publications, 20112009.

Web links and Video Lectures (e-Resources):

- 3. https://archive.nptel.ac.in/courses/127/106/127106227/
- https://www.youtube.com/watch?v=GSeeyJVD0JU

Skill Development Activities Suggested

- 1. Skill Development Activities Suggested:
- 2. Interact with industry (small, medium, and large).
- 3. Involve in research/testing/projects to understand their problems and help creative and innovative methods to solve the problem.
- 4. Involve in case studies and field visits/ fieldwork.
- 5. to the use of standards/codes etc., to narrow the gap between academia and industry.
- 6. Handle advanced instruments to enhance technical talent.
- 7. Gain confidence in modelling of systems and algorithms for transient and steady-state operations, thermal study, etc.

8. Accustom Work on different software/s (tools) to simulate, analyse and authenticate the output to interpret and conclude.

Course outcome (Course Skill Set)

At the end of the course the student will be able to :

Sl. No.	Description	Blooms Level
CO1	Discuss research methodology and the technique of defining a research problem	2
CO2	Explain the functions of the literature review in research, carrying out a literature search, developing theoretical and conceptual frameworks and writing a review	2
CO3	Explain various research designs, sampling designs, measurement and scaling techniques and also different methods of data collections.	2
CO4	Explain several parametric tests of hypotheses, Chi-square test, art of interpretation and writing research reports	2
CO5	Discuss various forms of the intellectual property, its relevance and business impact in the changing global business environment and leading	2

Program Outcome of this course

Sl. No.	Description	POs
1	An ability to independently carry out research/investigation and	1
	development work to solve practical problems.	
2	An ability to write and present a substantial technical report/document.	2
3	Students should be able to demonstrate a degree of mastery over the area as per the specialization of the program. The mastery should be at a level higher than the requirements in the appropriate bachelor program.	3
4	Students should be able to design, synthesize and analyse a physical engineering systems using modern tools and techniques.	4
5	Students should be able to conduct analytical and experimental investigations on Industrial and societal problems to provide sustainable solutions.	5

Assessment Details (both CIE and SEE)

The weightage of Continuous Internal Evaluation (CIE) is 50% and for Semester End Exam (SEE) is 50%. The minimum passing mark for the CIE is 50% of the maximum marks. A student shall be deemed to have satisfied the academic requirements and earned the credits allotted to each course. The student has to secure not less than 40% of maximum marks in the semester-end examination(SEE). In total of CIE and SEE student has to secure 50% maximum marks of the course.

Continuous Internal Evaluation (CIE):

CIE marks for the practical course is **50 Marks**.

The split-up of CIE marks for record/ journal and test are in the ratio 60:40.

- Each experiment to be evaluated for conduction with observation sheet and record write-up. Rubrics for the evaluation of the journal/write-up for hardware/software experiments designed by the faculty who is handling the laboratory session and is made known to students at the beginning of the practical session.
- Record should contain all the specified experiments in the syllabus and each experiment write-up will be evaluated for 10 marks.
- Total marks scored by the students are scaled downed to 30 marks (60% of maximum marks).
- Weightage to be given for neatness and submission of record/write-up on time.
- Department shall conduct 02 tests for 100 marks, the first test shall be conducted after the 8th week of the semester and the second test shall be conducted after the 14th week of the semester.
- In each test, test write-up, conduction of experiment, acceptable result, and procedural knowledge will carry a weightage of 60% and the rest 40% for viva-voce.

Total Hours of F	Pedagogy	25 Hrs Theory +10-12 Activities	Total Marks	100
Credits		03	Exam Hours	03
Course Learning objectives: • To understand the fundamentals of Quality tools and techniques • To apply the quality and reliability tools and techniques to real world problems • To Interpret the results of quality and reliability study for decision-making Module-1				
conformance, a	nd Quality of performance,	Quality control, Statistical quality con	ntrol, Cost of quality V	s Value of quality.
Fundamentals and their applic	of Probability and Statis ations in quality control, n	tics: Basic probability rules, Discrete umerical problems.	and continuous probab	oility distributions 5Hrs
Teaching- Learning Process	Chalk and talk, Videos, PowerPoint Presentation, Animations, Analytical methods, Problem solving, Numerical exercises, Creating conducive environment in classroom for discussions and understanding through peer learning, promoting self learning activities and Giving assignments			
		Module-2		
Control charts for Variables: Concept of variation, sources of variation and types. Objectives of control charts, Choice of variable, Subgroup size and subgrouping, frequency of sampling, control limits. Process capability analysis, Relationship of a Process Tolerance vis-a-vis Specification Tolerance, Process Capability Index, Variable control charts - X bar chart, R chart, revision of control limits, numerical problems. Introduction to run-sum test, Group Control charts, mid range and median charts.				
Learning Proces	Numerical exercises, Creating conducive environment in classroom for discussions and understanding through peer learning, promoting self learning activities and Giving assignments			
Module-3				
Control charts for Attributes: Control charts for fraction nonconforming (p chart, np chart) and nonconformities (c chart and u chart) with variable and constant sample size, Choice between variables and attributes control charts, revision of control limits, numerical problems.				
Failure Data Analysis : Introduction, Life Testing, Failure Data, Quantitative measures, MTTF, MTBF, Bathtub Curve, Mean Life, Introduction to Failure Mode and Effect Analysis.5Hrs				F, Bathtub Curve, 5Hrs
Teaching- Learning Process	Chalk and talk, Videos, PowerPoint Presentation, Animations, Analytical methods, Problem solving, Numerical exercises, Creating conducive environment in classroom for discussions and understanding through peer learning, promoting self learning activities and Giving assignments			
		Module-4		
Acceptance Sampling: Fundamentals of acceptance sampling, Sampling methods, OC Curves and their characteristics, AQL, IQL, LTPD, AOQ/AOQL. Types of acceptance sampling-Single, Double, Multiple, and Sequential sampling plans, Computing ATI, AFI, ASN. comparison amongst sampling plans, numerical problems. 5Hrs				heir characteristics, tial sampling plans, 5Hrs
Teaching- Learning Process	Chalk and talk, Videos, Po Numerical exercises, Crea through peer learning, pr	werPoint Presentation, Animations, A ting conducive environment in classro romoting self learning activities and Gi	nalytical methods, Prob oom for discussions and ving assignments	lem solving, understanding

Module-5

System Reliability: Reliability definition, Series, parallel and mixed configuration systems, Block diagram approach, numerical problems. Difficulty in achieving reliability, Different techniques available to improve reliability, Reliability-Cost trade off, numerical problems.

Maintainability and Availability: Introduction, Techniques available to improve maintainability and availability, tradeoff among reliability, maintainability and availability, Simple problems. 5Hrs

Teaching-	Chalk and talk, Videos, PowerPoint Presentation, Animations, Analytical methods, Problem solving,
Learning	Numerical exercises, Creating conducive environment in classroom for discussions and understanding
Process	through peer learning, promoting self learning activities and Giving assignments

Assessment Details (both CIE and SEE)

The weightage of Continuous Internal Evaluation (CIE) is 50% and for Semester End Exam (SEE) is 50%. The minimum passing mark for the CIE is 50% of the maximum marks. Minimum passing marks in SEE is 40% of the maximum marks of SEE. A student shall be deemed to have satisfied the academic requirements and earned the credits allotted to each subject/ course if the student secures not less than 50% (50 marks out of 100) in the sum total of the CIE (Continuous Internal Evaluation) and SEE (Semester End Examination) taken together.

Continuous Internal Evaluation:

- 1. Three Unit Tests each of 20 Marks
- 2. Two assignments each of **20 Marks** or **oneSkill Development Activity of 40 marks** to attain the COs and POs

The sum of three tests, two assignments/skill Development Activities, will be scaled down to 50 marks

CIE methods /question paper is designed to attain the different levels of Bloom's taxonomy as per the outcome defined for the course.

Semester End Examination:

- 1. The SEE question paper will be set for 100 marks and the marks scored will be proportionately reduced to 50.
- 2. The question paper will have ten full questions carrying equal marks.
- 3. Each full question is for 20 marks. There will be two full questions (with a maximum of four sub-questions) from each

Skill Development Activities Suggested

- At the end of the lecture/presentation, numerical exercises are to be taken up to solve problems related to the topics covered. Additional problems are to be given for practice and also as assignments under each of the topics covered.
- Industrial visits are to be made to understand the application of SQC tools and their usefulness in achieving, maintaining, and improving quality of products/services provided by the industry.

Course outcome

At the end of the course the student will be able to :

Sl. No.	Description	Blooms Level
CO1	Explain the basic concepts of Quality engineering and apply various Probability distributions to the real world Quality problems	L1, L2, L3, L4
CO2	Identify the need for control chart for variables and apply the same to assess, maintain, and improve statistical control of manufacturing processes	L1, L2, L3, L4,L5
CO3	Identify the need for control chart for attributes and apply the same to assess, maintain, and improve statistical control of manufacturing processes. Perform preliminary analysis of failure data.	L1, L2, L3, L4,L5
CO4	Apply the Quality assurance techniques like SSP, DSP, MSP etc., and construct OC curve for the acceptance plans and compute various parameters like ATI, AFI, ASN of Acceptance sampling plans.	L1, L2, L3, L4,L5
CO5	To estimate the Reliability of systems and improve it using different methods, to analyze the availability and maintainability of systems.	L1, L2, L3, L4

Industrial Design and Ergonomics

Course Code	22MPT22	CIE Marks	50
Teaching Hours/Week (L:P:SDA)	3:2:0	SEE Marks	50
e v			
Total Hours of Pedagogy	40 hours Theory + 10-12 Lab slots	Total Marks	100
Credits	04	Exam Hours	03

Course objectives:

- To increase awareness of the need for and role of ergonomics in occupational health.
- To obtain knowledge in the application of ergonomic principles to design of industrial workplaces and the prevention of occupational injuries
- To understand the breadth and scope of occupational ergonomics.

MODULE-1

Method study I / work simplication: Definition and objectives procedures, Selection of jobs.

Recording Tools and Techniques: Operation process chart, flow process charts (Man type-Material type), Flow diagram, critical examination, Develop the improved method.

Method study II/ Work simplication II: Tools for recording the movement of workers: String diagram, travel chart, multiactivity chart, and Man & Machine process chart, Gang process chart, Two handed process chart (operator process chart), principles of motion economy. 8Hrs

Teaching-	Chalk and talk, Videos, PowerPoint Presentation, Animations, Creating conducive environment in
Learning	classroom for discussions and understanding through peer learning, promoting self learning activities and
Process	Giving assignments

MODULE-2

Work measurement / Time study: Objectives, purpose/use techniques, Time study equipments, selection of job and operator for time study. Basic steps recording the information, examination of data, measurement of operation, rating and levelling, allowances, standard time.

Work Sampling: Procedure, sample size determination, estimation of standard time, advantages and disadvantages.

Synthetic data: Development of standard data, machine time calculation, practical systems of PMTS (work factor system,

Teaching-	Chalk and talk, Videos, PowerPoint Presentation, Animations, Creating conducive environment in
Learning	classroom for discussions and understanding through peer learning, promoting self learning activities
Process	and Giving assignments

MODULE-3

Introduction: An approach to industrial design - elements of design structure for industrial design in engineering application in modem manufacturing systems. Ergonomics and Industrial Design: Introduction - general approach to the man-machine relationship-workstation design-working position.

Control and Displays: shapes and sizes of various controls and displays-multiple displays and control situations - design of major controls in automobiles, machine tools etc., - design of furniture – design of instruments. **8Hrs**

Teaching-	Chalk and talk, Videos, PowerPoint Presentation, Animations, Creating conducive environment in
Learning	classroom for discussions and understanding through peer learning, promoting self learning activities and
Process	Giving assignments

MODULE-4

Visual Effects of Line and Form: The mechanics of seeing psychology of seeing, general influences of lined and form.Colour: colour and light - colour and objects - colour and the eye colour consistency - colour terms - reactions to colourand colour continuation - colour on engineering equipments.8Hrs

Teaching-	Chalk and talk, Videos, PowerPoint Presentation, Animations, Creating conducive environment in
Learning	classroom for discussions and understanding through peer learning, promoting self learning activities and
Process	Giving assignments

MODULE 5

Aesthetic Concepts: Concept of unity - concept of order with variety - concept of purpose style and environment - Aesthetic expressions. Style-components of style - house style, observations style in capital goods.

Industrial Design in Practice: General design - specifying design equipments - rating the importance of industrial design – industrial design in the design process. 8Hrs

Teaching-	Chalk and talk, Videos, PowerPoint Presentation, Animations, Creating conducive environment in
Learning	classroom for discussions and understanding through peer learning, promoting self learning activities
Process	and Giving assignments

PRACTICAL COMPONENT OF IPCC

Sl. No	Experiments
1	Preparing the Outline process chart and Multiple Activity Chart
2	Construct the Flow process chart for various applications
3	Experiments on the principle of motion economy by Two handed process chart.
4	Draw the Flow diagram and String diagram for various applications.
5	Rating practice using: pin board assembly, dealing a deck of cards and marble collection activity
6	Determining the standard time for simple operations using stopwatch time study
7	Measurement of parameters (heart beat rate, calorie consumption) using walking simulator
8	Measurement of parameters (heart beat rate, calorie consumption, revolutions per minute) using ergonometer.
	Experiments/ Activities/Demonstrations/Visits/Analytics etc., that enhances the skill of the learners
	(Activities are only for CIE)
1	Exercises on conducting method study for assembling simple components and office work.
2	Development of Layout plans using SLP technique. Experiments on Line balancing.
3	Determination of standard time using PDA device and time study software
Assessm	nent Details (both CIE and SEE)
The we	ightage of Continuous Internal Evaluation (CIE) is 50% and for Semester End Exam (SEE) is 50%. The minimum
passing	mark for the CIE is 50% of the maximum marks. Minimum passing marks in SEE is 40% of the maximum marks
of SEE.	A student shall be deemed to have satisfied the academic requirements and earned the credits allotted to each
subject/	course if the student secures not less than 50% (50 marks out of 100) in the sum total of the CIE (Continuous
Internal	Evaluation) and SEE (Semester End Examination) taken together
CIE for	the theory component of IPCC
4. Ty	wo Tests each of 20 Marks

- 5. Two assignments each of 10 Marks/One Skill Development Activity of 20 marks
- 6. Total Marks of two tests and two assignments/one Skill Development Activity added will be CIE for 60 marks, marks scored will be proportionally scaled down to **30 marks**.

CIE for the practical component of IPCC

• On completion of every experiment/program in the laboratory, the students shall be evaluated and marks shall be

awarded on the same day. The**15 marks** are for conducting the experiment and preparation of the laboratory record, the other **05 marks shall be for the test** conducted at the end of the semester.

- The CIE marks awarded in the case of the Practical component shall be based on the continuous evaluation of the laboratory report. Each experiment report can be evaluated for 10 marks. Marks of all experiments' write-ups are added and scaled down to 15 marks.
- The laboratory test at the end /after completion of all the experiments shall be conducted for 50 marks and scaled down to 05 marks.

Scaled-down marks of write-up evaluations and tests added will be CIE marks for the laboratory component of IPCC for **20 marks**.

SEE for IPCC

Theory SEE will be conducted by University as per the scheduled timetable, with common question papers for the course (duration 03 hours)

- 1. The question paper will be set for 100 marks and marks scored will be scaled down proportionately to 50 marks.
- 2. The question paper will have ten questions. Each question is set for 20 marks.
- 3. There will be 2 questions from each module. Each of the two questions under a module (with a maximum of 3 subquestions), **should have a mix of topics** under that module.
- 4. The students have to answer 5 full questions, selecting one full question from each module.

The theory portion of the IPCC shall be for both CIE and SEE, whereas the practical portion will have a CIE component only. Questions mentioned in the SEE paper shall include questions from the practical component).

- The minimum marks to be secured in CIE to appear for SEE shall be the 15 (50% of maximum marks-30) in the theory component and 10 (50% of maximum marks -20) in the practical component. The laboratory component of the IPCC shall be for CIE only. However, in SEE, the questions from the laboratory component shall be included. The maximum of 04/05 questions to be set from the practical component of IPCC, the total marks of all questions should not be more than the 20 marks.
- SEE will be conducted for 100 marks and students shall secure 40% of the maximum marks to qualify in the SEE. Marks secured will be scaled down to 50. (Student has to secure an aggregate of 50% of maximum marks of the course(CIE+SEE)

Activity Based Learning (Suggested Activities in Class)/ Practical Based learning

- Design of a reading table.
- Watering the garden.
- College layout for constructing flow diagram, string diagram.
- At the end of the lecture/presentation, exercises are to be taken up to solve problems related to the topics covered. Additional assignments are to be given under each of the topics covered.

Course outcome

At the end of the course the student will be able to :

Sl. No.	Description	Blooms Level
CO1	Define the various charts and to construct the charts on the basis of present method and develop a new / proposed method and identify the unnecessary movements. Explain the basic work measurement techniques and to gain knowledge of measurement of work, rating and imbibe the concept of allowance in estimating Standard Time.	L1, L2, L3, L4
CO2	Determine the basic concepts of Ergonomics and demonstrate a sound knowledge of Ergonomics in engineering applications.	L1, L2, L3, L4
CO3	Demonstrate a sound knowledge of Man-Machine Interfaces and design of displays and controls in engineering systems	L1, L2, L3

rogram Outcome of this course					
Sl. No.	Description	POs			
1	An ability to independently carry out research/investigation and development work to solve practical problems	PO1			
2	An ability to write and present a substantial technical report/document.	PO2

Process	and Giving assignments				
	Module-4				
Scheduling of scheduling of jo and control base	operations: need for scheduling, loading of machines, scheduling context, scheduling flow shops, ob shops, input output control, operational control issues in mass production systems, operations planning ed on the theory of constrains, related problems. 5Hrs				

Teaching-	Chalk and talk, Videos, PowerPoint Presentation, Animations, Creating conducive environment in
Learning	classroom for discussions and understanding through peer learning, promoting self learning activities
Process	and Giving assignments

Module-5

SINGLE MACHINE SCHEDULING: Concept, measures of performance, SPT rule, Weighted SPT rule, EDD rule, minimizing

the number of tardy jobs.

FLOW -SHOP SCHEDULING: Introduction, Johnson's rule for 'n' jobs on 2 and 3 machines, CDS heuristic. JOB-SHOP SHEDULING: Types of schedules, Heuristic procedure, scheduling 2 jobs on 'm' machines.

Teaching-	Chalk and talk, Videos, PowerPoint Presentation, Animations, Creating conducive environment in		
Learning	classroom for discussions and understanding through peer learning, promoting self learning activities and		
Process	Giving assignments		

Assessment Details (both CIE and SEE)

The weightage of Continuous Internal Evaluation (CIE) is 50% and for Semester End Exam (SEE) is 50%. The minimum passing mark for the CIE is 50% of the maximum marks. Minimum passing marks in SEE is 40% of the maximum marks of SEE. A student shall be deemed to have satisfied the academic requirements and earned the credits allotted to each subject/ course if the student secures not less than 50% (50 marks out of 100) in the sum total of the CIE (Continuous Internal Evaluation) and SEE (Semester End Examination) taken together.

Continuous Internal Evaluation:

- 1. Three Unit Tests each of **20 Marks**
- 2. Two assignments each of **20 Marks** or **one Skill Development Activity of 40 marks** to attain the COs and POs

The sum of three tests, two assignments/skill Development Activities, will be scaled down to 50 marks

CIE methods /question paper is designed to attain the different levels of Bloom's taxonomy as per the outcome defined for the course.

Semester End Examination:

- 1. The SEE question paper will be set for 100 marks and the marks scored will be proportionately reduced to 50.
- 2. The question paper will have ten full questions carrying equal marks.
- 3. Each full question is for 20 marks. There will be two full questions (with a maximum of four sub-questions) from each

Suggested Learning Resources:

Books

- 1. Operations Management Monks J.G McGraw Hill International Editions 1987.
- 2. Production and Operations Management Pannerselvam. R PHI 2nd edition
- 3. Production and Operations Management Chary, S.N TataMcGraw Hill. 3rd edition

Web links and Video Lectures (e-Resources):

- <u>https://www.investopedia.com/terms/o/operations-management.asp</u>
- <u>https://www.youtube.com/watch?v=Hy48AFKEepo</u>
- <u>https://www.shipbob.com/blog/demand-forecasting/</u>
- https://www.youtube.com/watch?v=IDITxCjlyFE
- https://decisions.com/videos/scheduling-job-flow/

Skill Development Activities Suggested

At the end of the lecture/presentation, numerical exercises are to be taken up to solve problems related to the topics covered. Additional problems are to be given for practice and also as assignments under each of the topics covered.

Course outcome

At the end of the course the student will be able to :

Sl. No.	Description	Blooms Level
CO1	Describe the basic concept of OM, manufacturing trends in INDIA.	L1, L2, L3
CO2	Design of product layout, process layout and analyse process and capacity	L1, L2, L3, L4,L5
CO3	Applying appropriate inventory planning technique	L1, L2, L3,
CO4	Assess the demand and prioritise MPS	L, L2, L3, L4,L5
CO5	Design MRP, MRPII and schedule the jobs and machines.	L1, L2, L3, L4

Program Outcome of this course

SI. No.	Description	POs
1	An ability to independently carry out research /investigation and development work to solve practical problems.	P01
2	An ability to write and present a substantial technical report/document.	PO2
3	Students should be able to demonstrate a degree of mastery over the area as per the specialization of the program. The mastery should be at a level higher than the requirements in the appropriate bachelor program	PO3
4	Understand contemporary issues in manufacturing engineering and develop relationship between product design and manufacturability to create safe, reliable, and cost-effective products.	PO4
5	Understand the process of converting customer needs into engineering specifications to create product designs that are sensitive to user needs and robust against unanticipated uses and misuse	PO5
6	Employ advanced prototyping methods to shorten design cycles and narrow alternatives without restricting innovation.	P06
7	Understand and debate the roles and responsibilities of a product designer/manufacturer on society.	P07

Industrial Robotics					
Course Code	22MPT232	CIE Marks	50		
Teaching Hours/Week (L:P:SDA)	2:0:2	SEE Marks	50		
Total Hours of Pedagogy	25 Hrs Theory +10-12 activities	Total Marks	100		
Credits	03	Exam Hours	03		
 Course Learning objectives: Understand the concept of robotics and its drives. Understand the sensors applications and images recognition mechanism. 					

- Program robot and analyse the computational element of robot computer system.
- Transform robot manipulator using knowledge kinematics and mathematical methods.
- Design and control robot cells and understand the application of robots.

Module-1

FUNDAMENTAL CONCEPTS OF ROBOTICS: History, present status and future trends, Robotics. Robot, Definition. Robotics Systems and Robot Anatomy, Specification of Robotics. Resolution, Repeatability and Accuracy of a Manipulator.

ROBOT DRIVES: Power transmission systems and control Robot drive mechanisms, hydraulic-electric-pneumatic drives. Mechanical transmission method – Rotary-to-Rotary motion conversion. Rotary-to-linear motion conversion end effectors – types-grip and problem Remote-Centered compliance Devices- Control of Actuators in Robotic Mechanisms. **5Hrs**

Teaching-Learning Process

Chalk and Talk / White board, Power Point Presentation, Video Demonstration or Simulation.

Module-2

SENSORS AND INTELLIGENT ROBOTS: Sensory devices – Non-optical-Position sensors – Optical position sensors – velocity sensors – proximity sensors: Contact and non-contact type- Touch and slip sensors – Force and Torque Sensors – AI and Robotics.

COMPUTER VISION FOR ROBOTICS SYSTEMS: Robot vision systems – Imaging components – Image representation – Hardware aspects-Picture coding – Object Recognition and Categorization- Visual inspection – software considerations – commercial – Robotics vision systems. 5Hrs

Teaching-	Chalk and Talk / White board, Power Point Presentation, Video Demonstration or Simulation
Learning Process	chaik and taiky white board, rower romerresentation, video bemonstration of simulation.

Module-3

COMPUTER CONSIDERATIONS FOR ROBOTIC SYSTEMS: Computer architecture for robots, hardware, Computational elements in robotic applications – Robot programming – sample programs path planning – Robot's computer system. 5Hrs

Teaching-	
Learning	Chalk and Talk / White board, Power Point Presentation, Video Demonstration or Simulation.
Process	

Module-4

TRANSFORMATIONS AND KINEMATICS: Homogeneous Co-ordinates – Co-ordinate Reference Frames – Homogeneous Transformations for the manipulator – the forward and inverse problem of manipulator kinematics – Motion generation – Manipulator dynamics – Jacobian in terms of D.H.Matrices controller architecture. **5Hrs**

Teaching-	Chalk and Talk / White board, Power Point Presentation, Video Demonstration or Simulation.
Learning	

Process

Module-5

ROBOT CELL DESIGN AND CONTROL: Specifications of Commerical Robots – Robot Design and Process specifications – motor selection in the design of a robotic joint – Robot Cell layouts – Economic and Social aspects of robotics.

APPLICATIONS OF ROBOTS: Capabilities of Robots – Robotics Applications – Obstacle avoidance – Robotics in India – The future of Robotics. 5Hrs

Teaching-	
Learning	Chalk and Talk / White board, Power Point Presentation, Video Demonstration or Simulation.
Process

Design for Manufacture and Assembly						
Course Code	22MPT233	CIE Marks	50			
Teaching Hours/Week (L:P:SDA)	2:0:2	SEE Marks	50			
Total Hours of Pedagogy	25 Hrs Theory +10-12 activities	Total Marks	100			
Credits	03	Exam Hours	03			

Course Learning objectives:

- Understand the principles of manufacturability and design for manufacture.
- Design casting and weldment for economic production quantity.
- Understand the concept of assembly, its design and true position of datum system.
- Design parts cut to length and screw machine parts of various processes, open and closed die forging.
- Design guidelines and background for powder metallurgy part and reviewing of formed parts.

Module-1

NTRODUCTION: General design principles for manufacturability, Process Capability, Feature tolerance, Geometrical tolerance, Surface finish, Review of relationship between attainable Tolerance grades, and different machining processes, Economics of process selection, Principles of Design for Manufacture, Quality Manufacturability, Introduction to Tolerance Charting Technique. **5Hrs**

Teaching-Learning Process

Chalk and Talk / White board, Power Point Presentation, Video Demonstration or Simulation.

Module-2

DESIGN OF CASTINGS: Redesign of castings based on parting line considerations, Minimising core requirements, other design consideration, economic production quantities.

DESIGN OF WELDMENTS: Advantages of weldments, Design for economical and efficient welding, Redesigning cast members using weldments, use of welding symbols, Economic production quantities, Design recommendations, cost reduction

Teaching-
Learning ProcessChalk and Talk / White board, Power Point Presentation, Video Demonstration or Simulation.

Module-3

DESIGN FOR ASSEMBLY: Applications of selective assembly, Design recommendations for different fastening arrangements, Automatic assembly, control of axial play in assemblies, Design for easy assembly, Design for easy disassembly.

 TRUE POSITION THEORY AND DATUM SYSTEMS: Theoretically exact dimension, virtual size concept, assembly considerations as applied to True Position Tolerancing, examples, Grouped datum systems, different types examples.

 5Hrs

Teaching-	
Learning	Chalk and Talk / White board, Power Point Presentation, Video Demonstration or Simulation.
Process	

Module-4

DESIGN FOR MACHINING: Parts cut to length, screw machined products, Machined round holes, Moulded parts, Parts produced buy planning. shaping & slotting, Broached parts, Ground parts, roller burnished parts, Gears, Economical deburring, re dimensioning of parts based on manufacturing datum.

DESIGN FOR FORGING: Introduction, open die forging. Closed die forging.

5Hrs

Teaching-
LearningChalk and Talk / White board, Power Point Presentation, Video Demonstration or Simulation.Process

Module-5

DESIGN FOR POWDER METALLURGY: Introduction, Design guidelines, Background, Design for Powder Metallurgy parts.

A review of design considerations in formed metal components, non metallic parts, Designing for heat treatment, Design for quality and mass production. 5Hrs

 Teaching Learning

 Chalk and Talk / White board, Power Point Presentation, Video Demonstration or Simulation.

 Process

Skill Development Activities Suggested

- Quizzes
- Assignments
- Seminars

Course outcome At the end of the course the student will be able to :

Sl. No.	Description	Blooms Level
CO1	Learn how AI methods can be used in a manufacturing workflow for process optimization and control	L1, L2, L3, L4
CO2	Discover AI/machine learning methods that enable design automation and customization	L1, L2, L3, L4,L5
CO3	Explore AI/machine learning methods for performance-driven design that automatically translate functional specifications of objects to manufacturable designs	L1, L2, L3, L4,L5
CO4	Learn AI based Robot Architecture & Applications in Automated Manufacturing, Robot Vision & Motion, Multi agent and swarm robotics.	L1, L2, L3, L4,L5
CO5	Explore Material functions, types of material handling equipment, analysis of material handling systems, design of system, conveyor system.	L1, L2, L3, L4

Sl. No.		Description										
1	An abilit to solve	An ability to independently carry out research/investigation and development work to solve practical problems										
2	An abilit	An ability to write and present a substantial technical report/document.										
3	To be ab of the pr	To be able to demonstrate a degree of mastery over the area as per the specialization of the program.										
4	Understa relations and cost	Understand contemporary issues in manufacturing engineering and develop relationship between product design and manufacturability to create safe, reliable, and cost-effective products.										
5	Understand the process of converting customer needs into engineering specifications to create product designs that are sensitive to user needs and robust against unanticipated use and misuse									ng 1st PO5		
6	Employ advanced prototyping methods to shorten design cycles and narrow alternatives without restricting innovation.									PO6		
7	Understand and debate the roles and responsibilities of a product designer/manufacturer on society.								act PO7			
Mapping of	COS and F	POs (Indicativ	ve only)

PROFESSIONAL ELECTIVE - II

Design of Experiments						
Course Code	22MPT241	CIE Marks	50			
Teaching Hours/Week (L:P:SDA)	2:0:2	SEE Marks	50			
Total Hours of Pedagogy	25 Hrs Theory +10-12 activities	Total Marks	100			
Credits	03	Exam Hours	03			

Course Learning objectives:

- Plan data collection, to turn data into information and to make decisions that lead appropriate action.
- Apply the methods taught to real life situations.
- Plan, analyze, and interpret the results of experiments.
- To understand the Orthogonal arrays.
- Analyze the Parameter and tolerance design concepts.

Module-1

Strategy of Experimentation, Typical applications of Experimental design, Basic Principles, Guidelines for Designing Experiments. **Concepts of random variable,** probability, density function cumulative distribution function. Sample and population, Measure of Central tendency; Mean median and mode, Measures of Variability, Concept of confidence level. Statistical Distributions: Normal, Log Normal & Weibull distributions. Hypothesis testing, Probability plots, choice of sample size. Illustration through Numerical examples. **5Hrs**

Teaching-	Chalk and talk, Videos, PowerPoint Presentation, Animations, Analytical methods, Problem solving,
Learning	Numerical exercises, Creating conducive environment in classroom for discussions and understanding
Process	through peer learning, promoting self learning activities and Giving assignments

Module-2

Classical Experiments: Factorial Experiments: Terminology: factors, levels, interactions, treatment combination, randomization, Two-level experimental designs for two factors and three factors. Three-level experimental designs for two factors and three factors, Factor effects, Factor interactions, Fractional factorial design, Saturated Designs, Central composite designs. Illustration through Numerical examples. 5Hrs

Teaching-	Chalk and talk, Videos, PowerPoint Presentation, Animations, Analytical methods, Problem solving,
Learning	Numerical exercises, Creating conducive environment in classroom for discussions and understanding
Process	through peer learning, promoting self learning activities and Giving assignments

Module-3

Measures of variability, Ranking method, Column effect method & Plotting method, Analysis of variance (ANOVA) in Factorial Experiments: YATE's algorithm for ANOVA, Regression analysis, Mathematical models from experimental data. Illustration through Numerical examples.

Quality, Western and Taguchi's quality philosophy, elements of cost, Noise factors causes of variation. Quadratic lossfunction & variations of quadratic loss function. Robust Design: Steps in Robust Design: Parameter design and ToleranceDesign. Reliability Improvement through experiments, Illustration through Numerical examples.5Hrs

Teaching-	Chalk and talk, Videos, PowerPoint Presentation, Animations, Analytical methods, Problem solving,						
Learning	arning Numerical exercises, Creating conducive environment in classroom for discussions and understanding						
Process	through peer learning, promoting self learning activities and Giving assignments						
	Module-4						
	Midult-4						
Types of Ortho	Types of Orthogonal Arrays, selection of standard orthogonal arrays, Linear graphs and Interaction assignment, Dummy						
level Technique	level Technique, Compound factor method, Modification of linear graphs. Illustration through Numerical examples. 5Hrs						
Teaching-	Chalk and talk, Videos, PowerPoint Presentation, Animations, Analytical methods, Problem solving,						
Learning	Numerical exercises, Creating conducive environment in classroom for discussions and understanding						

Process through peer learning, promoting self learning activities and Giving assignments

Module-5

Evaluation of sensitivity to noise. Signal to Noise ratios for static problems: Smaller-the-better type, Nominal-the – better-type, Largerthe- better type. Signal to Noise ratios for Dynamic problems. Illustration through Numerical examples.

Parameter and tolerance design concepts, Taguchi's inner and outer arrays, parameter design strategy, tolerance design strategy. Illustration through Numerical examples. 5Hrs

Teaching-
LearningChalk and talk, Videos, PowerPoint Presentation, Animations, Analytical methods, Problem solving,
Numerical exercises, Creating conducive environment in classroom for discussions and understanding
through peer learning, promoting self learning activities and Giving assignments

Assessment Details (both CIE and SEE)

The weightage of Continuous Internal Evaluation (CIE) is 50% and for Semester End Exam (SEE) is 50%. The minimum passing mark for the CIE is 50% of the maximum marks. Minimum passing marks in SEE is 40% of the maximum marks of SEE. A student shall be deemed to have satisfied the academic requirements and earned the credits allotted to each subject/ course if the student secures not less than 50% (50 marks out of 100) in the sum total of the CIE (Continuous Internal Evaluation) and SEE (Semester End Examination) taken together.

Continuous Internal Evaluation:

- 1. Three Unit Tests each of **20 Marks**
- 2. Two assignments each of **20 Marks** or **oneSkill Development Activity of 40 marks** to attain the COs and POs

The sum of three tests, two assignments/skill Development Activities, will be scaled down to 50 marks

CIE methods /question paper is designed to attain the different levels of Bloom's taxonomy as per the outcome defined for the course.

Semester End Examination:

- 1. The SEE question paper will be set for 100 marks and the marks scored will be proportionately reduced to 50.
- 2. The question paper will have ten full questions carrying equal marks.
- 3. Each full question is for 20 marks. There will be two full questions (with a maximum of four sub-questions) from **Suggested Learning Resources:**

Assessment Details (both CIE and SEE)

The weightage of Continuous Internal Evaluation (CIE) is 50% and for Semester End Exam (SEE) is 50%. The minimum passing mark for the CIE is 50% of the maximum marks. Minimum passing marks in SEE is 40% of the maximum marks of SEE. A student shall be deemed to have satisfied the academic requirements and earned the credits allotted to each subject/ course if the student secures not less than 50% (50 marks out of 100) in the sum total of the CIE (Continuous Internal Evaluation) and SEE (Semester End Examination) taken together.

Continuous Internal Evaluation:

- 1. Three Unit Tests each of 20 Marks
- 2. Two assignments each of **20 Marks** or **one Skill Development Activity of 40 marks** to attain the COs and POs

The sum of three tests, two assignments/skill Development Activities, will be scaled down to 50 marks

CIE methods /question paper is designed to attain the different levels of Bloom's taxonomy as per the outcome defined for the course.

Semester End Examination:

- 1. The SEE question paper will be set for 100 marks and the marks scored will be proportionately reduced to 50.
- 2. The question paper will have ten full questions carrying equal marks.
- 3. Each full question is for 20 marks. There will be two full questions (with a maximum of four sub-questions) from each

Suggested Learning Resources:

Books

- 1. Total Quality Management Dale H. Besterfield, Pearson Education India ISBN:8129702606, Edition 03.
- 2. Total Quality Management, Engineers, M. Zairi head, Publishing.
- 3. Managing for Quality and Performance Excellence, James R. Evans and W M, Cengage Learning, 9th edition,
- 4. A New American TQM, four revolutions in management, Shoji Shiba, Alan Graham, Productivity press, Oregon, 1990.
- 5. Engineering Optimization Methods and Applications
- 6. Organizational Excellence through TQM, H. Lal, New age Publications, 2008.
- 7. Introduction to Operations Research- Concepts and Cases, F.S. Hillier. G.J. Lieberman, Tata McGraw Hill, 9th Edition, 2010

Skill Development Activities Suggested

At the end of the lecture/presentation, numerical exercises are to be taken up to solve problems related to the topics covered. Additional problems are to be given for practice and also as assignments under each of the topics covered.

Course outcome

At the end of the course the student will be able to :

Sl. No.	Description	Blooms Level
CO1	To understand the concept of Quality costs.	L1, L2, L3, L4
CO2	Understand the concept of problem solving using the process.	L1, L2, L3, L4
CO3	Understand the use of control charts for improving the process quality.	L1, L2, L3, L4
CO4	Illustrate design of experiments using Taguchi technique.	L1, L2, L3, L4, L5
CO5	Acquire basic knowledge of total quality management.	L1, L2, L3, L4, L5

Program Outcome of this course

SI. No.	Description	POs
1	An ability to independently carry out research /investigation and development work to solve practical problems.	P01
2	An ability to write and present a substantial technical report/document.	P02
3	Students should be able to demonstrate a degree of mastery over the area as per the specialization of the program. The mastery should be at a level higher than the requirements in the appropriate bachelor program	PO3
4	Understand contemporary issues in manufacturing engineering and develop relationship between product design and manufacturability to create safe, reliable, and cost-effective products.	PO4
5	Understand the process of converting customer needs into engineering specifications to create product designs that are sensitive to user needs and robust against unanticipated uses and misuse	PO5
6	Employ advanced prototyping methods to shorten design cycles and narrow alternatives without restricting innovation.	P06
7	Understand and debate the roles and responsibilities of a product designer/manufacturer on society.	P07

MINI PROJECT WITH SEMINAR

Course Code	22MPT25	CIE Marks	100			
Number of contact Hours/Week	0-4-2	SEE Marks				
Credits	03	Exam Hours/Batch				

Course objectives:

- To support independent learning and innovative attitude.
- To guide to select and utilize adequate information from varied resources upholding ethics.
- To guide to organize the work in the appropriate manner and present information (acknowledging the sources) clearly.
- To develop interactive, communication, organisation, time management, and presentation skills.
- To impart flexibility and adaptability.
- To inspire independent and team working.
- To expand intellectual capacity, credibility, judgement, intuition.
- To adhere to punctuality, setting and meeting deadlines.
- To instil responsibilities to oneself and others.
- To train students to present the topic of project work in a seminar without any fear, face audience confidently, enhance communication skill, involve in group discussion to present and exchange ideas.

Mini-Project with seminar: This may be hands-on practice, survey report, data collection and analysis, coding, mobile app development, field visit and report preparation, modelling of system, simulation, analysing and authenticating, case studies, etc.

CIE marks shall be awarded by a committee comprising of HoD as Chairman, Guide/co-guide, if any, and a senior faculty of the department. Students can present the seminar based on the completed mini-project. Participation in the seminar by all postgraduate students of the program shall be mandatory.

The CIE marks awarded for Mini-Project work and Seminar, shall be based on the evaluation of Mini Project work and Report, Presentation skill and performance in Question-and-Answer session in the ratio 50:25:25. Mini-Project with Seminar shall be considered as a head of passing and shall be considered for vertical progression as well as for the award of degree. Those, who do not take-up/complete the Mini Project and Seminar shall be declared as fail in that course and have to complete the same during the subsequent semester.

There is **no SEE** for this course.

Course outcomes:

At the end of the course the student will be able to:

- Present the mini-project and be able to defend it.
- Make links across different areas of knowledge and to generate, develop and evaluate ideas and information to apply these skills to the project task.
- Habituated to critical thinking and use problem solving skills.
- Communicate effectively and to present ideas clearly and coherently in both the written and oral forms.
- Work in a team to achieve common goal.
- Learn on their own, reflect on their learning and take appropriate actions to improve it.

Γ

QT and QC Laboratory

	Q								
Course	Code	22MPTL26	CIE Marks	50					
Teachir	ng Hours/Week (L:P:SDA)	1:2:0	SEE Marks	50					
Credits		02	Exam Hours	03					
Course	objectives:			•					
•	• The course aims at building capabilities in the students for analyzing different situations in the industrial/ business scenario involving limited resources and finding the optimal solution within constraints.								
Sl. No		Experiments							
1	Regression analysis using any of the stat	istical packages.							
2	Correlation analysis using any of the stat	cistical packages.							
3	Use of software package to solve LPP pr	oblems.							
4	Use of software package to solve assignment and transportation problems.								
5	Use of software package to solve PERT problems.								
6	Use of software package to solve CPM problems.								
7	Plotting Quality Control chart for attribu relevant to various industrial Applicatior	tes using Software Packages. ns	Plotting appropriate chart	s and diagrams					
8	Plotting Quality Control chart for variabl relevant to various industrial Applicatior	es using Software Packages. F Is	Plotting appropriate charts	and diagrams					
Experin	speriments beyond the syllabus (For CIE only)								
1	Development of simple MIS application	programs for use in Library.							
2	Development of simple MIS application	programs for use in Bank.							
3	Development of simple MIS application programs for use in Business shop.								
4	Development of simple MIS application programs for use in Hospital.								
Course	outcomes								
At the e	and of the course the student will be able to	0:							
1.	Analyse any real life system with limited	constraints and depict it in a	model form.						
2.	Convert the problem into a mathematica	al model.							
3.	Solve mathematical model manually as v	vell as using software such as	TORA, etc.						
4.	Understand variety of problems such as assignment, transportation, travelling salesman, etc.								

- 5. Solve the problems using linear programming approach using software.
- 6. Solve the problems on PERT and CPM using software.
- 7. Solve Quality Control chart for attributes and variables using Software Packages

Assessment Details (both CIE and SEE)

The weightage of Continuous Internal Evaluation (CIE) is 50% and for Semester End Exam (SEE) is 50%. The minimum passing mark for the CIE is 50% of the maximum marks. A student shall be deemed to have satisfied the academic requirements and earned the credits allotted to each course. The student has to secure not less than 40% of maximum marks in the semester-end examination(SEE). In total of CIE and SEE student has to secure 50% maximum marks of the course.

Continuous Internal Evaluation (CIE):

CIE marks for the practical course is **50 Marks**.

The split-up of CIE marks for record/ journal and test are in the ratio 60:40.

- Each experiment to be evaluated for conduction with observation sheet and record write-up. Rubrics for the evaluation of the journal/write-up for hardware/software experiments designed by the faculty who is handling the laboratory session and is made known to students at the beginning of the practical session.
- Record should contain all the specified experiments in the syllabus and each experiment write-up will be evaluated for 10 marks.
- Total marks scored by the students are scaled downed to 30 marks (60% of maximum marks).
- Weightage to be given for neatness and submission of record/write-up on time.
- Department shall conduct 02 tests for 100 marks, the first test shall be conducted after the 8th week of the semester and the second test shall be conducted after the 14th week of the semester.
- In each test, test write-up, conduction of experiment, acceptable result, and procedural knowledge will carry a weightage of 60% and the rest 40% for viva-voce.
- The suitable rubrics can be designed to evaluate each student's performance and learning ability.
- The average of 02 tests is scaled down to **20 marks** (40% of the maximum marks).

Assessment Details (both CIE and SEE)

The weightage of Continuous Internal Evaluation (CIE) is 50% and for Semester End Exam (SEE) is 50%. The minimum passing mark for the CIE is 50% of the maximum marks. Minimum passing marks in SEE is 40% of the maximum marks of SEE. A student shall be deemed to have satisfied the academic requirements and earned the credits allotted to each subject/ course if the student secures not less than 50% (50 marks out of 100) in the sum total of the CIE (Continuous Internal Evaluation) and SEE (Semester End Examination) taken together.

Continuous Internal Evaluation:

- 3. Three Unit Tests each of 20 Marks
- 4. Two assignments each of **20 Marks** or **one Skill Development Activity of 40 marks** to attain the COs and POs

The sum of three tests, two assignments/skill Development Activities, will be scaled down to 50 marks

CIE methods /question paper is designed to attain the different levels of Bloom's taxonomy as per the outcome defined for the course.

Semester End Examination:

- 1. The SEE question paper will be set for 100 marks and the marks scored will be proportionately reduced to 50.
- 2. The question paper will have ten full questions carrying equal marks.
- 3. Each full question is for 20 marks. There will be two full questions (with a maximum of four sub-questions) from each

Suggested Learning Resources:

Books

- 1. Surface preparations & finishes for Metals James A Murphy McGraw Hill.
- 2. Principles of metal surface treatment and protection Pergamon Press Gabe, David Russell Description, Oxford ; New York

Web links and Video Lectures (e-Resources):

- VTU e-Shikshana Program
- VTU EDUSAT Program

Skill Development Activities Suggested

At the end of the lecture/presentation, numerical exercises are to be taken up to solve problems related to the topics covered. Additional problems are to be given for practice and also as assignments under each of the topics covered.

Course outcome At the end of the course the student will be able to :						
Sl. No.	Description	Blooms Level				
CO1	Understand the basic concept of coating, plating and metal spray methods in electroplates.	L1, L2, L3, L4				
CO2	Understand the mechanism of coating formation and their properties.	L1, L2, L3, L4				
CO3	Test coated and spray metal surfaces using suitable heat treatment methods.	L1, L2, L3, L4				
CO4	Heat treat gears, spindle and cutting tools	L1, L2, L3, L4, L5				
CO5	Understand electro deposition and Nano coating technique	L1, L2, L3, L4, L5				

Program Outcome of this course

Sl. No.	Description	POs
1	An ability to independently carry out research /investigation and development work to solve practical problems.	P01
2	An ability to write and present a substantial technical report/document.	P02
3	Students should be able to demonstrate a degree of mastery over the area as per the specialization of the program. The mastery should be at a level higher than the requirements in the appropriate bachelor program	PO3
4	Understand contemporary issues in manufacturing engineering and develop relationship between product design and manufacturability to create safe, reliable, and cost-effective products.	PO4
5	Understand the process of converting customer needs into engineering specifications to create product designs that are sensitive to user needs and robust against unanticipated uses and misuse	PO5
6	Employ advanced prototyping methods to shorten design cycles and narrow alternatives without restricting innovation.	P06
7	Understand and debate the roles and responsibilities of a product designer/manufacturer on society.	P07

Advanced Manufacturing Practices					
Course Code	22MPT323	CIE Marks	50		
Teaching Hours/Week (L:P:SDA)	3:0:0	SEE Marks	50		
Total Hours of Pedagogy	40 Hrs	Total Marks	100		
Credits	03	Exam Hours	03		

Course Learning objectives:

- Students will introduced to the concept of JIT production & TQC
- Students will learn about the effective use of Kanaban as per Toyota production system.
- Students will understand the different plant configuration & their characteristics, Automation & Robotics..

Module-1

Need of CPC for a company, what CPC can do, CPC-getting the right tool.

JIT – Introduction – The spread of JIT Movement, some definitions of JIT, core Japanese practices of JIT, Creating
continuous Flow Manufacture, Enabling JIT to occur, Basic elements of JIT, Benefits of JIT.8Hrs

Teaching-
LearningChalk and talk, Videos, PowerPoint Presentation, Animations, Creating conducive environment in
classroom for discussions and understanding through peer learning, promoting self learning activities
and Giving assignments

Module-2

Just in Time Production – Primary purpose, profit through cost reduction, Elimination of over production, Quality control, Quality Assurance, Respect for Humanity, Flexible work Force, JIT Production Adapting to changing production Quantities, process layout for shortened lead Times, Standardization of operation, Automation.

Sequence and scheduling used by suppliers: Monthly and daily Information. Sequenced withdrawal system by sequenced schedule table, problems and counter measures in applying the Kanban system to sub contractors. 8Hrs

Teaching-	Chalk and talk, Videos, PowerPoint Presentation, Animations, Creating conducive environment in		
Learning Process	classroom for discussions and understanding through peer learning, promoting self learning activities		
	and Giving assignments		
Module-3			

Just-in-Time I purchase order effects, small C	Production with Total Quality Control just in time concept, cutting lot sizes, cutting set-up times, cutting costs, the JIT cause-Effect chain, Scrap/Quality Improvements, Motivational effects, Responsibility group improvement Activities, withdrawal of Buffer Inventory, the total Quality Control Concept. 8Hrs
Teaching-	Chalk and talk, Videos, PowerPoint Presentation, Animations, Creating conducive environment in
Learning	classroom for discussions and understanding through peer learning, promoting self learning activities
Process	and Giving assignments
	Module-4
Total Quality concepts categy facilitator, sma Aids, Exposure plant, TQC in J	Control-Introduction -Total Quality Control concepts, responsibility, learning from the west, TQC orized, Goals, Habit of improvement, perfection, Basics, process control, Easy to see Quality control as II lot sizes, Housekeeping, Less than full capacity scheduling, Daily machine checking, Techniques and e of problems, Fool proof Devices, Tools of Analysis, QC Circles, TQC in Japanese-owned US Electronics apanese-owned Automotive plants. 8Hrs
Teaching- Learning Process	Chalk and talk, Videos, PowerPoint Presentation, Animations, Creating conducive environment in classroom for discussions and understanding through peer learning, promoting self learning activities and Giving assignments
	Module-5
Plant Configu parts from Tub Kanban, physic CAD and Manu Teaching- Learning	rations:Introduction-ultimate lant configuration, job shop Fabrication, Frame Welding, Forming Frameing, Dedicated production lines, overlapped production, the daily schedule, Forward Linkage by means of cal merger of processes, Adjacency, mixed Models, Automated production Lines, Pseudo Robots, Robots, ufacturing, Conveyors and stacker Cranes, Automatic Quality Monitoring.8HrsChalk and talk, Videos, PowerPoint Presentation, Animations, Creating conducive environment in classroom for discussions and understanding through peer learning, promoting self learning activities and
Process	Giving assignments
Assessment I The weightage passing mark for SEE. A student subject/ cours (Continuous In	Details (both CIE and SEE) of Continuous Internal Evaluation (CIE) is 50% and for Semester End Exam (SEE) is 50%. The minimum or the CIE is 50% of the maximum marks. Minimum passing marks in SEE is 40% of the maximum marks of c shall be deemed to have satisfied the academic requirements and earned the credits allotted to each se if the student secures not less than 50% (50 marks out of 100) in the sum total of the CIE internal Evaluation) and SEE (Semester End Examination) taken together.
 Three Units Two assignation attain the COst 	it Tests each of 20 Marks gnments each of 20 Marks or one Skill Development Activity of 40 marks s and POs
The sum of thr	ee tests, two assignments/skill Development Activities, will be scaled down to 50 marks
CIE methods outcome defin	/question paper is designed to attain the different levels of Bloom's taxonomy as per the ned for the course.
Semester En	d Examination:
 The SEE quest The quest Each full or module. 	uestion paper will be set for 100 marks and the marks scored will be proportionately reduced to 50. ion paper will have ten full questions carrying equal marks. question is for 20 marks. There will be two full questions (with a maximum of four sub-questions) from each

Simulation and Modelling of Production Systems					
Course Code	22MPT324	CIE Marks	50		
Teaching Hours/Week (L:P:SDA)	3:0:0	SEE Marks	50		
Total Hours of Pedagogy	40 Hrs	Total Marks	100		
Credits	03	Exam Hours	03		

Course Learning objectives:

- Define the basics of simulation modeling and replicating the practical situations in organizations
- Generate random numbers and random variates using different techniques.
- Develop simulation model using heuristic methods.
- Analysis of Simulation models using input analyzer, and output analyzer
- Explain Verification and Validation of simulation model.

Module-1

Principle of Computer Modelling and Simulation: Monte Carlo simulation. Nature of computer- modeling and simulation. Limitations of simulation, areas of applications. System and Environment: Components of a system -discrete and continuous systems, Models of a system –a variety of modeling approaches. Simulation Software: Selection of simulation software, simulation packages. 8Hrs

Teaching-
Learning
ProcessChalk and talk, Videos, PowerPoint Presentation, Animations, Analytical methods, Problem solving,
Numerical exercises, Creating conducive environment in classroom for discussions and understanding
through peer learning, promoting self learning activities and Giving assignments

Module-2

Discrete Event Simulation: Concepts in discrete event simulation, manual simulation using event scheduling, single channel queue, too server queue, simulation of inventory problem.

Statistical Models in Simulation: Discrete distributions, continuous distributions.

Discrete Event Simulation: Concepts in discrete event simulation, manual simulation using event scheduling, single channel queue, too server queue, simulation of inventory problem.

Teaching-	Chalk and talk, Videos, PowerPoint Presentation, Animations, Analytical methods, Problem solving,
Learning	Numerical exercises, Creating conducive environment in classroom for discussions and understanding
Process	through peer learning, promoting self learning activities and Giving assignments

Module-3

Random Number Generation: Techniques for generating random numbers- Mid square method -the mod product method -Constant multiplier technique -Additive congruential method –Linear congruential method -Tests for random numbers -The Kolmogorov-Smimov test -the Chi-square test. 8Hrs

Teaching-Learning Process Chalk and talk, Videos, PowerPoint Presentation, Animations, Analytical methods, Problem solving, Numerical exercises, Creating conducive environment in classroom for discussions and understanding through peer learning, promoting self learning activities and Giving assignments

Random Variable Generation: Inversion transforms technique-exponential distribution, uniform distribution, weibuldistribution, continuous distribution, generating approximate normal variates - Erlang distribution.8Hrs

Module-4

Teaching-	Chalk and talk, Videos, PowerPoint Presentation, Animations, Analytical methods, Problem solving,
Learning	Numerical exercises, Creating conducive environment in classroom for discussions and understanding
Process	through peer learning, promoting self learning activities and Giving assignments

Empirical Discrete Distribution: Discrete uniform - Poisson distribution –geometric distribution -acceptance -rejection technique for Poisson distribution gamma distribution

Design and Evaluation of Simulation Experiments: variance reduction techniques -antithetic variables,

variables-verification and validation of simulation models.

Teaching-
LearningChalk and talk, Videos, PowerPoint Presentation, Animations, Analytical methods, Problem solving,
Numerical exercises, Creating conducive environment in classroom for discussions and understanding
through peer learning, promoting self learning activities and Giving assignments

Assessment Details (both CIE and SEE)

The weightage of Continuous Internal Evaluation (CIE) is 50% and for Semester End Exam (SEE) is 50%. The minimum passing mark for the CIE is 50% of the maximum marks. Minimum passing marks in SEE is 40% of the maximum marks of SEE. Α	dvanced Fluid Power Systems		
Course Code	22MPT325	CIE Marks	50
Teaching Hours/Week (L:P:SDA)	3:0:0	SEE Marks	50
Total Hours of Pedagogy	40 Hrs	Total Marks	100
Credits	03	Exam Hours	03

Course Learning objectives:

- 1. To Study the fundamentals of Hydraulic Power Pumps, Actuators and Motors.
- 2. To develop a sound knowledge of control components in Hydraulic Systems.
- 3. To have basic skills to design Hydraulic Circuits and analyze them.
- 4. To acquire the fundamental knowledge on pneumatic control.
- 5. To develop skill sets to handle Pneumatic Actuators, Valves, Pneumatic circuits and logic circuits

Module-1

Introduction: Pascal Law, Advantages of Fluid Power, Applications of Fluid Power, Components of a Fluid Power.

Hydraulic Power Unit: Introduction, Pumping Theory, Pump Classification, Gear Pumps, (Vane Pumps- simple, balanced & pressure compensated vane pump, Vane design) Piston Pumps- Radial, Axial (Bent axis & Swash plate), Pump Performance, Pump Noise, Ripple in pumps.

Hydraulic Actuators: Linear actuator- cylinders, Mechanics of Hydraulic cylinder loading, limited rotation hydraulic actuator, cylinder cushioning, Gear, Vane & Piston motor, Motor performance, Hydrostatic transmission. **8Hrs**

Human Resource Management					
Course Code	22MPT331	CIE Marks	50		
Teaching Hours/Week (L:P:SDA)	3:0:0	SEE Marks	50		
Total Hours of Pedagogy	40 Hrs	Total Marks	100		
Credits	03	Exam Hours	03		
Course Learning objectives:					

- To enable the students to understand the HR Management and system at various levels in general and in certain specific industries or organizations.
- To help the students focus on and analyse the issues and strategies required to select and develop manpower resources.
- To develop relevant skills necessary for application in HR related issues.
- To Enable the students to integrate the understanding of various HR concepts along with the domain concept in order to take correct business decisions

Module-1

INTRODUCTION: Evolution of HRM, Objectives, Functions and Policies.

HUMAN RESOURCE PLANNING: Uses and benefits, Man Power Inventory, Man Power Forecasting, Methods of ManPower Forecasting, job Description, Job Specification.8Hrs

Teaching-	Chalk and talk, Videos, PowerPoint Presentation, Animations, Creating conducive environment in
Learning	classroom for discussions and understanding through peer learning, promoting self learning activities
Process	and Giving assignments

Module-2

RECRUITMENT: Sources of Man power, Advertisement, Short Listing of Candidates calling Candidates for selection Process.

SELECTION: Selection procedure – Written Test, Group Discussion. Interview – Different methods, advantages and limitations, Psychological testing – Advantages and limitations, Induction procedure, transfers, promotion, exit

- to the second second (To the second s	Law consistence to a the Conserve Discoversion (intermediation)
Teaching-	Chalk and talk, Videos, PowerPoint Presentation, Animations, Creating conducive environment in
Learning Process	classroom for discussions and understanding through peer learning, promoting self learning activities
	and Giving assignments

Module-3

TRAINING AND DEVELOPMENT: Identification of Training needs, Training Evaluation, Training Budget, Executive Development – Different Approaches, Non-executive development – Different methods.

PERFORMANCE APPRAISAL: Components (all round performance appraisal), Methods. Advantages and limitations of
different methods, Personal Counseling based on Annual Confidential Reports.8Hrs

Teaching-	Chalk and talk, Videos, PowerPoint Presentation, Animations, Creating conducive environment in						
Learning	classroom for discussions and understanding through peer learning, promoting self learning activities						
Process	and Giving assignments						

Module-4

COUNSELLING AND HUMAN RESOURCE ACCOUNTING: Characteristics, Need, Function, Types, Suggestions for personnel development, communication function, communication process, effective communication. Human resource records, Advantages of HR accounting, Various methods of accounting. 8Hrs

Teaching-	Chalk and talk, Videos, PowerPoint Presentation, Animations, Creating conducive environment in					
Learning	classroom for discussions and understanding through peer learning, promoting self learning activities					
Process	and Giving assignments					

Module-5

INDUSTRIAL RELATIONS: Indian trade union act, standing orders act, Indian factories act

INDUSTRIAL DISPUTES AND SETTLEMENT: Indian Industrial Disputes act, Industrial disputes settlement machinery. Works committee, Board of Conciliation, Voluntary Arbitration, Compulsory arbitration, Court of inquiry, Industrial tribunal, Adjudication. 8Hrs

Teaching-
LearningChalk and talk, Videos, PowerPoint Presentation, Animations, Creating conducive environment in
classroom for discussions and understanding through peer learning, promoting self learning activities and
Giving assignmentsProcessGiving assignments

Assessment Details (both CIE and SEE)

The weightage of Continuous Internal Evaluation (CIE) is 50% and for Semester End Exam (SEE) is 50%. The minimum passing mark for the CIE is 50% of the maximum marks. Minimum passing marks in SEE is 40% of the maximum marks of SEE. A student shall be deemed to have satisfied the academic requirements and earned the credits allotted to each subject/ course if the student secures not less than 50% (50 marks out of 100) in the sum total of the CIE (Continuous Internal Evaluation) and SEE (Semester End Examination) taken together.

Continuous Internal Evaluation:

- 1. Three Unit Tests each of 20 Marks
- 2. Two assignments each of **20 Marks** or **one Skill Development Activity of 40 marks** to attain the COs and POs

The sum of three tests, two assignments/skill Development Activities, will be scaled down to 50 marks

CIE methods /question paper is designed to attain the different levels of Bloom's taxonomy as per the outcome defined for the course.

Semester End Examination:

1. The SEE question paper will be set for 100 marks and the marks scored will be proportionately reduced to 50.

Suggested Learning Resources:

Books

Skill Development Activities Suggested

At the end of the lecture/presentation, numerical exercises are to be taken up to solve problems related to the topics covered. Additional problems are to be given for practice and also as assignments under each of the topics covered.

Course outcome

At the end of the course the student will be able to :

Sl. No.	Description	Blooms Level
CO1	Understand the basic concepts of HRM, Functions and role of HRM	L1, L2, L3, L4
CO2	Know methodology of job selection process implemented in various sectors.	L1, L2, L3, L4,L5
CO3	Analyse the effectiveness in training, evaluating and benchmarking HR training	L1, L2, L3, L4,L5
CO4	Understand the career development concept and methods of personal appraisal	L1, L2, L3, L4,L5
CO5	Understand International activities of HRM, Staffing, communication, appraisal training and interview system.	L1, L2, L3, L4

Program Outcome of this course

SI. No.	Description					
1	An ability to independently carry out research /investigation and development work to solve practical problems.					
2	An ability to write and present a substantial technical report/document.					
3	Students should be able to demonstrate a degree of mastery over the area as per the specialization of the program. The mastery should be at a level higher than the requirements in the appropriate bachelor program					
4	Understand contemporary issues in manufacturing engineering and develop relationship between product design and manufacturability to create safe, reliable, and cost-effective products.	PO4				
5	Understand the process of converting customer needs into engineering specifications to create product designs that are sensitive to user needs and robust against unanticipated uses and misuse	PO5				
6	Employ advanced prototyping methods to shorten design cycles and narrow alternatives without restricting innovation.	P06				
7	Understand and debate the roles and responsibilities of a product	P07

Project Management							
Course Code 22MPT333 CIE Marks 50							
Teaching Hours/Week (L	:P:SDA)	3:0:0	SEE Marks	50			
Total Hours of Pedagogy		40 Hrs	Total Marks	100			
Credits		03	Exam Hours	03			
 Course Learning objectives: To enable the students to understand the project management and its types. To help the students focus on and analyse the issues and strategies required to Project Selection and Prioritization To develop relevant skills necessary for Resourcing Projects and Budgeting the Projects. To enable the students to integrate the understanding of various Network Analysis. 							
Introduction: Definition of project, characteristics of projects, understand projects, types of projects, scalability of project tools, project roles. Project Selection and Prioritization: Strategic planning process, Strategic analysis, strategic objectives, portfolio alignment – identifying potential projects, methods of selecting projects, financial mode / scoring models to select projects, prioritizing projects, securing and negotiating projects. 8Hrs							
Process	Chalk and Talk / White board, Power Point Presentation, Video Demonstration or Simulation.						
		Module-2					
Planning Projects: Defining the project scope, Project scope checklist, Project priorities, Work Breakdown Structure (WBS), Integrating WBS with organisation, coding the WBS for the information system. Scheduling Projects: Purpose of a project schedule, historical development, how project schedules are limited and created, develop project schedules, uncertainty in project schedules, Gantt chart. Teaching-Learning Process Chalk and Talk / White board, Power Point Presentation, Video Demonstration or Simulation.							
		Module-3					
Resourcing Projects: Abilities needed when resourcing projects, estimate resource needs, creating staffing management plant, project team composition issues. Budgeting Projects: Cost planning, cost estimating, cost budgeting, establishing cost control. Project Risk Planning: Risk Management Planning, risk identification, risk analysis, risk response planning.							
l eaching-Learning Process	ching-Learning Chalk and Talk / White board, Power Point Presentation, Video Demonstration or Simulation.						
Module-4							
 Performing Projects: Project supply chain management: - Plan purchasing and acquisitions, plan contracting, contract types, project partnering and collaborations, project supply chain management. Project Progress and Results: Project Balanced Scorecard Approach, Internal project, customer, financial issues. 							
Finishing the project: Ter management, perform a	Finishing the project: Terminate project early, finish projects on time, secure customer feedback and approval, knowledge management, perform administrative and contract closure.8Hrs						
Feaching-Learning Chalk and Talk / White board, Power Point Presentation, Video Demonstration or Simulation.							

Module-5

Network Analysis: Introduction, network construction - rules, Fulkerson's rule for numbering the events.

AON and AOA diagrams: Critical path method (CPM) to find the expected completion time of a project.

Floats: PERT for finding expected duration of an activity and project, determining the probability of completing a Project.

Predicting the completion time of project: Crashing of simple projects.

8Hrs

Teaching-Learning
ProcessChalk and Talk / White board, Power Point Presentation, Video Demonstration or Simulation.

Course Code	22MPT334	CIE Marks	50
Teaching Hours/Week (L:P:SDA)	3:0:0	SEE Marks	50
Total Hours of Pedagogy	40 Hrs	Total Marks	100
Credits	03	Exam Hours	03

Course Learning objectives:

- To inspect a component in a safe, reliable and cost effective manner without causing damage to the equipment
- To weld inspectors can determine whether a weld is strong or has potential defects that could compromise it integrity
- Ultrasonic testing is to detection of defect, measurement of their parameters assessment of their hazard assessment feasibility operation of the particular tested objected
- Liquid penetrant testing is to provide visual evidence of surface discontinuities in solid non-porous materials
- Magnetic Particle inspection is a NDT method, to detect surface and subsurface flaws in ferromagnetic Materials
 Module-1

Introduction: Definition of Non-destructive testing, Need for NDT techniques and its applications, Types of NDT techniques, benefits from Non-destructive Testing, nature of flaws ,various steps involved in NDT, uses of Non-destructive techniques.

Non-Destructive Testing of Welds: Definition of weld, types of weld joints, Welding processes; Gas welding, shielded metal arc welding, TIG spot welding, submerged arc welding, Defects in welded joints, Defects associated with residual stresses, Testing, measurement and control (TMC) of welds, Testing of welded joints; destructive test, Non-destructive tests.

Teaching-	Introduction about Non-destructive testing, and NDT of welds, Chalk and talk used for draw figures and
Learning	Power Point presentation and YouTube videos, Animation videos, creating right time in classroom
Process	discussions. Giving activities &assignments.

Module-2

Ultrasonic Testing : Introduction frequency of ultrasonic Waves, Generation of Ultrasonic waves, Piezo-electric materials for Ultrasonic Transducers, Types of Ultrasonic Waves, Different kinds of Ultrasonic Transducers, Types of ultrasonic waves, Reflection, Refraction and scattering of Ultrasonic beam, working of ultrasonic Flaws detectors, industrial application, Pulse-echo and through transmission Testing, Scanner assemblies for transmission and pulse-echo techniques, types of scan, shear wave and surface wave applications, Resonance techniques, use of Ultrasonic for thickness measurements.

Teaching-	Discussed about ultrasonic testing and Chalk and talk used for draw figures and Power Point
Learning	presentation and YouTube videos, Animation videos, creating right time in classroom discussions.
Process	Giving activities &assignments.

Module-3

Liquid Penetrant Testing: Types of Penetrants, Types of developers, Penetration time, Inspection, Post emulsifiable fluorescent penetrants system, Water washable fluorescent penetrants, Low and High temperature penetrants, High sensitivity fluorescence penetrant examination, Advanced LPT techniques; Ultrasonic pumping to enhance performance, ultrasonically enhanced penetrant inspection of small weldments, Mechanised remote liquid penetrant testing of piping of reactors. 8Hrs

Teaching-	Discussed about liquid penetrant testing and Chalk and talk method and Power Point presentation and
Learning	YouTube videos, Animation videos, creating right time in classroom discussions. Giving activities
Process	&assignments.

Module-4

Eddy current Testing: instrumentation of ECT, inspection of welds, advanced eddy current testing, Multi-frequency ECT, 3D phase array ECT, Remote field ECT, Magnetically based eddy current. Flux leakage, Computer modelling of ECT, Digital signal Processing, Eddy current imaging; eddy current imaging system, imaging and characterisation of defects, Eddy current array instrumentation for fixed position scanning. **8Hrs**

Teaching-
Learning
ProcessDiscussed about liquid Eddy current testing and Chalk and talk method and Power Point presentation and
YouTube videos, Animation videos, creating right time in classroom discussions. Giving activities
&assignments.

Module-5

Magnetic particle Flaws detection: Principle of Magnetic Flaw detection, Types and methods of Magnetisation, Magnetic particles, Dry and Wet methods of Magnetic Particles inspection, Use of fluorescent Coated Magnetic particles, Industrial applications, Working of a Few Commercially available Magnetic Crack Detectors, Flaw detection in Rods, pipes and a short work piece, Precautions, Limitations, Residual magnetism, Need for Demagnetisation Research Techniques using Magnetic Particle Methods. 8Hrs

Teaching-
LearningDiscussed about liquid Magnetic particle Flaws detection and Chalk and talk method and Power Point
presentation and YouTube videos, Animation videos, creating right time in classroom discussions. Giving
activities & assignments.

Assessment Details (both CIE and SEE)

- To develop an understanding of basic concepts and role of Logistics and supply chain management in business.
- To understand how supply chain drivers play an important role in redefining value chain excellence of Firms.
- To develop analytical and critical understanding & skills for planning, designing and operations of supply chain.
- To understand, appraise and integrate various supply chain strategies.

Module-1

BUILDING A STRATEGIC FRAME WORK TO ANALYSE SUPPLY CHAINS: Supply chain stages and decision phase, process view of a supply chain. Supply chain flows. Examples of supply chains. Competitive and supply chain strategies. Achieving strategic fit. Expanding strategic scope. Drivers of supply chain performance. Framework for structuring drivers – Inventory, Transportation, Facilities, Information. Obstacles to achieving fit, Case discussions.

DESIGNING THE SUPPLY CHAIN NETWORK: Distribution Networking – Role, Design. Supply Chain Network (SCN) – Role, Factors, Framework for Design Decisions. **8Hrs**

Teaching-Learning Process	Chalk and Talk / White board, Power Point Presentation, Video Demonstration or Simulation.						
Module-2							
 FACILITY LOCATION AND NETWORK DESIGN: Models for facility location and capacity allocation. Impact of uncertainty on SCN – discounted cash flow analysis, evaluating network design decisions using decision trees. Analytical problems. PLANNING AND MANAGING INVENTORIES IN A SUPPLY CHAIN: Review of inventory concepts, Concepts of Safety 							
Teaching-Learning Chalk and Talk / White board, Power Point Presentation, Video Demonstration or Simulatio Process Chalk and Talk / White board, Power Point Presentation, Video Demonstration or Simulatio							
Module-3							

SOURCING, TRANSPORTATION AND PRICING PRODUCTS: Role of sourcing, supplier – scoring & assessment, selection and contracts. Design collaboration. Role of transportation, Factors affecting transportation decisions. Modes of transportation and their performance characteristics. Designing transportation network. Trade-off in transportation design. Tailored transportation, Routing and scheduling in transportation. International transportation. Analytical problems. Role of Revenue Management in the supply chain, Revenue management for: Multiple customer segments, perishable assets, seasonal demand, bulk and spot contracts.

Teaching-Learning	Chalk and Talk / White board Power Point Presentation Video Demonstration or Simulation
Process	Chark and Tark / White board, Fower Foint Fresentation, video Demonstration of Simulation.

Module-4

COORDINATION AND TECHNOLOGY IN THE SUPPLY CHAIN: Co-ordination in a supply chain: Bullwhip effect. Obstacles to coordination. Managerial levers to achieve coordination, Building strategic

partnerships. The role of IT supply Chain, The Supply Chain IT framework, CRM, Internal SCM, SRM. The role of ebusiness in a supply chain, The e-business framework, e-business in practice. Case discussion. **8Hrs**

Teaching-Learning	Chalk and Talk / White board Power Point Presentation Video Demonstration or Simulation
Process	chaik and taik / white board, rower roint resentation, video bemonstration of similation.

Module-5

APPLICATION OF VALUE ANALYSIS: Application of Value analysis in the field of Accounting, Appearance Design, Costreduction, Engineering, manufacturing, Management, Purchasing, Quality Control, Sales, marketing, MaterialManagement Etc., Comparison of approach of Value analysis & other management techniques.8Hrs

Teaching-Learning	Chalk and Talk / White hoard Power Point Presentation, Video Demonstration or Simulation
Process	Chark and Tarky white board, Fower Foint Fresentation, video bemonstration of simulation.

Assessment Details (both CIE and SEE)

The weightage of Continuous Internal Evaluation (CIE) is 50% and for Semester End Exam (SEE) is 50%. The minimum passing mark for the CIE is 50% of the maximum marks. Minimum passing marks in SEE is 40% of the maximum marks of SEE. A student shall be deemed to have satisfied the academic requirements and earned the credits allotted to each subject/ course if the student secures not less than 50% (50 marks out of 100) in the sum total of the CIE (Continuous Internal Evaluation) and SEE (Semester End Examination) taken together.

Continuous Internal Evaluation:

- 1. Three Unit Tests each of 20 Marks
- 2. Two assignments each of **20 Marks** or **one Skill Development Activity of 40 marks** to attain the Cos and Pos

The sum of three tests, two assignments/skill Development Activities, will be scaled down to 50 marks

CIE methods /question paper is designed to attain the different levels of Bloom's taxonomy as per the outcome defined for the course.

Semester End Examination:

- 1. `The SEE question paper will be set for 100 marks and the marks scored will be proportionately reduced to 50.
- 2. The question paper will have ten full questions carrying equal marks.
- 3. Each full question is for 20 marks. There will be two full questions (with a maximum of four sub-questions) from each

Suggested Learning Resources:

Books

- 1. Supply Chain Management Strategy, Planning, Sunil Chopra & Peter Meindl, Pearson Education Asia ISBN: 81-7808-272-1. – 2001
- 2. Supply Chain and Logistics Management, UpendraKachuru
- 3. Supply Chain Redesign Transforming Supply Chains into Integrated Value Systems, Robert B Handfield, Ernest L

- Nichols, Jr. Pearson Education Inc, ISBN: 81-7808- 272-1. 2001.
- 4. Modelling the Supply Chain, Jeremy F Shapiro, uxbury, Thomson Learning, McGraw Hill
- 5. Designing & Managing the Supply Chain, David Simchi Levi, Philip Kaminsky& Edith Simchi Levi, McGraw Hill

Skill Development Activities Suggested

- Quizzes
- Assignments
- Seminars

Course outcome

At the end of the course the student will be able to :

Description	Blooms Level
Understand the fundamentals of elements and functions of supply chain, role of drivers and demand forecasting	L1, L2, L3, L4
To apply various techniques of inventory management and their practical situations.	L1, L2, L3,
	L4,L5
Analyze how supply chain decisions related to facility location can be applied to various industries and designing the supply chain.	L1, L2, L3, L4,L5
	Description Understand the fundamentals of elements and functions of supply chain, role of drivers and demand forecasting To apply various techniques of inventory management and their practical situations. Analyze how supply chain decisions related to facility location can be applied to various industries and designing the supply chain.

Program Outcome of this course

Sl. No.	Description	POs
1	An ability to independently carry out research/investigation and development work to solve practical problems	P01
2	An ability to write and present a substantial technical report/document.	PO2
3	To be able to demonstrate a degree of mastery over the area as per the specialization of the program.	P03
4	Understand contemporary issues in manufacturing engineering and develop relationship between product design and manufacturability to create safe, reliable, and cost-effective products.	PO4
5	Understand the process of converting customer needs into engineering specifications to create product designs that are sensitive to user needs and robust against unanticipated use and misuse	PO5
6	Employ advanced prototyping methods to shorten design cycles and narrow alternatives without restricting innovation.	PO6
7	Understand and debate the roles and responsibilities of a product designer/manufacturer on society.	P07

Mapping of	COS and POs	(Indicative	only)
------------	-------------	-------------	-------

		PO1	PO2	PO3	PO4	PO5	PO6	PO7
	CO1	3	3	3	3	2	1	3
	CO2	3	3	3	1	2	1	3
	CO3	3	3	3	1	1	1	1
	CO4	2	2	2	3	3	1	2
	CO5	3	3	3	3	1	1	1

PROJECT WORK PHASE – 1

Course Code	22MPT34	CIE Marks	100
Number of contact Hours/Week	0-6-0	SEE Marks	
Credits	03	Exam Hours	

Course objectives:

- Support independent learning.
- Guide to select and utilize adequate information from varied resources maintaining ethics.
- Guide to organize the work in the appropriate mannerand present information (acknowledging the sources) clearly.
- Develop interactive, communication, organisation, time management, and presentation skills.
- Impart flexibility and adaptability.
- Inspire independent and team working.
- Expand intellectual capacity, credibility, judgement, intuition.
- Adhere to punctuality, setting and meeting deadlines.
- Instil responsibilities to oneself and others.
- Train students to present the topic of project work in a seminar without any fear, face audience confidently, enhance communication skill, involve in group discussion to present and exchange ideas.

Project Phase-1: The project work shall be carried out individually. However, in case a disciplinary or interdisciplinary project requires more participants, then a group consisting of not more than three shall be permitted.

Students in consultation with the guide/co-guide (if any) in disciplinary project or guides/co-guides (if any) of all departments in case of multidisciplinary projects, shall pursue a literature survey and complete the preliminary requirements of the selected Project work. Each student shall prepare a relevant introductory project document, and present a seminar.

Course Outcomes:

At the end of the course the student will be able to:

- Demonstrate a sound technical knowledge of their selected project topic.
- Undertake problem identification, formulation, and solution.
- Design engineering solutions to complex problems utilising systems approach.
- Communicate with engineers and the community at large in written an oral forms.
- Demonstrate the knowledge, skills and attitudes of a professional engineer.

Continuous Internal Evaluation

- CIE marks shall be awarded by a committee comprising of HoD as Chairman, all Guide/s and co-guide/s (if any) and a senior faculty of the concerned departments. The CIE marks awarded for project work phase -1, shall be based on the evaluation of Project Report, Project Presentation skill, and performance in the Question-and-Answer session in the ratio of **50:25:25**.
- There will be **no SEE**.

INTERNSHIP					
Course Code	22MPTI36	CIE Marks	50		
Number of contact Hours/Week	6 Weeks	SEE Marks	50		
Credits	06	Exam Hours	03		

Course Objectives:

Internship/Professional practice provide students the opportunity of hands-on experience that include personal training, time and stress management, interactive skills, presentations, budgeting, marketing, liability and risk management, paperwork, equipment ordering, maintenance, responding to emergencies etc. The objectives are further,

- To put theory into practice.
- To expand thinking and broaden the knowledge and skills acquired through course work in the field.
- To relate to, interact with, and learn from current professionals in the field.
- To gain a greater understanding of the duties and responsibilities of a professional.
- To understand and adhere to professional standards in the field.
- To gain insight to professional communication including meetings, memos, reading, writing, public speaking, research, client interaction, input of ideas, and confidentiality.
- To identify personal strengths and weaknesses.
- To develop the initiative and motivation to be a self-starter and work independently.

Internship: Students under the guidance of internal guide/s and external guide shall take part in all the activities regularly to acquire as much knowledge as possible without causing any inconvenience at the place of internship. Each student, is required to

- Present the seminar on the internship orally and/or through power point slides.
- Answer the queries and involve in debate/discussion.
- Submit the report duly certified by the external guide.
- The participants shall take part in discussion to foster friendly and stimulating environment in which the students are motivated to reach high standards and become self-confident.

Course outcomes:

At the end of the course the student will be able to:

- Gain practical experience within industry in which the internship is done.
- Acquire knowledge of the industry in which the internship is done.
- Apply knowledge and skills learned to classroom work.
- Develop a greater understanding about career options while more clearly defining personal career goals.
- Experience the activities and functions of professionals.
- Develop and refine oral and written communication skills.
- Identify areas for future knowledge and skill development.
- Expand intellectual capacity, credibility, judgment, intuition.
- Acquire the knowledge of administration, marketing, finance and economics.

Continuous Internal Evaluation

CIE marks for the Internship report, presentation and question and answer session shall be awarded in the ratio of 50:25:25 for the **total CIE of 50 marks** by the committee constituted for the purpose by the Head of the Department. The committee shall consist of three faculty from the department with committee comprising of HoD as Chairman, all Guide/s and co-guide/s (if any) and a senior faculty of the concerned departments.

Semester End Examination

SEE marks for the internship report (30 marks), seminar (20 marks) and question and answer session (10 marks) shall be awarded in the ratio of 50:25:25 for the **total SEE of 50 marks** (based on the quality of report and presentation skill, participation in the question and answer session) by the examiners appointed by the University.

IV SEMESTER

IV SEMESTER

PROJECT WORK PHASE -2				
Course Code	22MPT41	CIE Marks	100	
Number of contact Hours/Week	8 Hours/Week	SEE Marks	100	
Credits	18	Exam Hours	03	

Course Objectives:

- To support independent learning.
- To guide to select and utilize adequate information from varied resources maintaining ethics.
- To guide to organize the work in the appropriate manner and present information (acknowledging the sources) clearly.
- To develop interactive, communication, organisation, time management, and presentation skills.
- To impart flexibility and adaptability.
- To inspire independent and team working.
- To expand intellectual capacity, credibility, judgement, intuition.
- To adhere to punctuality, setting and meeting deadlines.
- To instill responsibilities to oneself and others.
- To train students to present the topic of project work in a seminar without any fear, face audience confidently, enhance communication skill, involve in group discussion to present and exchange ideas.

Project Work Phase - II: Students in consultation with the guide/co-guide (if any) in disciplinary project or guides/co-guides (if any) of all departments in case of multidisciplinary projects, shall continue to work of Project Work phase -1to complete the Project work. Each student / batch of students shall prepare project document, and present a seminar. CIE marks shall be awarded by a committee comprising of HoD as Chairman, all Guide/s and co-guide/s (if any) and a senior faculty of the concerned departments. The CIE marks awarded for project work phase -2, shall be based on the evaluation of Project Report, Project Presentation skill, and performance in the Question-and-Answer session in the ratio of 50:25:25.

SEE shall be at the end of IV semester. Project work evaluation and Viva-Voce examination (SEE), after satisfying the plagiarism check, shall be as per the University norms.

Course Outcomes:

At the end of the course the student will be able to:

- Present the project and be able to defend it.
- Make links across different areas of knowledge and to generate, develop and evaluate ideas and information so as to apply these skills to the project task.
- Habituated to critical thinking and use problem solvingskills
- Communicate effectively and to present ideas clearly and coherently in both the written and oral forms.
- Work in a team to achieve common goal.
- Learn on their own, reflect on their learning and take appropriate actions to improve it.
